Self and Affect Stefan Lang, Maik Niemeck, 2025-01-11

The self self awareness and emotions are central subjects within contemporary philosophy of mind but comparatively little attention has been paid to the relationships between them This volume brings together philosophers from different specialisms to explore these relationships from three different angles First whether a theory of self awareness can contribute to a theory of emotion including how different aspects and kinds of self awareness are related to different emotions Second from the opposite direction whether research into emotions can help achieve a better understanding of self consciousness Finally the book considers how emotions are involved in the nature and development of selves

Self and Affect is essential reading for all scholars and researchers of the philosophy of mind especially those focussing on emotions and self awareness
