Bonanno,2019-11-05

In this thoroughly revised and updated classic a renowned psychologist shows that mourning is far from predictable and all of us share a surprising ability to be resilient The conventional view of grieving encapsulated by the famous five stages of grief denial anger bargaining depression and acceptance is defined by a mourning process that we can only hope to accept and endure In The Other Side of Sadness psychologist and emotions expert George Bonanno argues otherwise Our inborn emotions anger and denial but also relief and joy help us deal effectively with loss To expect or require only grief stricken behavior from the bereaved does them harm In fact grieving goes beyond mere sadness and it can actually deepen interpersonal connections and even lead to a new sense of meaning in life **The Other Side of Happiness** Brock Bastian,2018-01-25

Required reading Brock Bastian expertly picks apart the fundamental idea that humans thrive when they approach pleasure and avoid pain explaining why hardship sometimes yields richer lives that are laden with meaning deep social connections and unexpected bliss Adam Alter author of Drunk Tank Pink In today s culture happiness has become the new marker of success while hardships are viewed as personal weaknesses or problems to be fixed We increasingly try to eradicate pain through medication and by insulating

ourselves from risk and offence despite being the safest generation to have ever lived Yet in his research renowned social psychologist Brock Bastian has found that suffering and sadness are neither antithetical to happiness nor incidental to it they are a necessary ingredient for emotional well being Drawing on psychology neuroscience and internationally acclaimed findings from Bastian s own lab *The Other Side of Happiness* encourages us to take a more fearless approach to living The most thrilling moments of our lives are often balanced on a knife edge between pleasure and pain whether it is finding your true love holding your new born for the first time finishing a marathon or even plunging into an icy sea This is because pain and the threat of loss quite literally increase our capacity for happiness as Bastian reveals making us stronger more resilient more connected to other people and more attuned to what truly matters Pain even makes us more mindful since in our darkest moments we are especially focused and aware of the world around us Our addiction to positivity and the pursuit of pleasure is actually making us miserable Brock Bastian shows that without some pain we have no real way to achieve and appreciate the kind of happiness that is true and transcendent
