Architectural Reflections Colin St. John Wilson, 2000 Louise Erdrich is one of the most critically and commercially successful Native American writers This book is the first fully comprehensive treatment of Erdrich's writing analysing the textual complexities and diverse contexts of her work to date Drawing on the critical archive relating to Erdrich's work and Native American literature Stirrup explores the full depth and range of her authorship Breaking Erdrich's oeuvre into several groupings poetry early and late fiction memoir and children's writing Stirrup develops individual readings of both the critical arguments and the texts themselves He argues that Erdrich's work has developed an increasing political acuity to the relationship between ethics and aesthetics in Native American literatures Erdrich's insistence on being read as an American writer is shown to be in constant and mutually inflecting dialogue with her Ojibwe heritage This sophisticated analysis is of use to students and readers at all levels of engagement with Erdrich's writing

Boom Cities Otto Saumarez Smith, 2019-03-21 Boom Cities is the first published history of the profound transformations of British city centres in the 1960s It has often been said that urban planners did more damage to Britain's cities than even the Luftwaffe had managed and this study details the rise and fall of modernist urban planning revealing its origins and the dissolution of the cross party consensus before the ideological smearing that has ever since characterized the high rise towers dizzying ring roads and concrete precincts that were left behind The rebuilding of British city centres during the 1960s drastically affected the built form of urban Britain including places ranging from traditional cathedral cities through to the decaying towns of the industrial revolution Boom Cities uncovers both the planning philosophy and the political cultural and legislative background that created the conditions for these processes to occur across the country Boom Cities reveals the role of architect planners in these transformations The volume also provides an unconventional account of the end of modernist approaches to the built environment showing it from the perspective of planning and policy elites rather than through the emergence of public opposition to planning

Nationalism and Architecture Darren Deane, Sarah Butler, 2016-12-05 Unlike regionalism in architecture which has been widely discussed in recent years nationalism in architecture has not been so well explored and understood However the most powerful collective representation of a nation is through its architecture and how that architecture engages the global arena by expressing defining and sometimes negating a sense of nation in order to participate in the international world Bringing together case studies from Europe North and South America the Middle East Africa Asia and Australia this book provides a truly global exploration of the relationship between architecture and nationalism via the themes of regionalism

and representation various national building projects ethnic and trans national expression national identities and histories of nationalist architecture and the philosophies and sociological studies of nationalism It argues that nationalism needs to be trans national as a notion to be critically understood and the geographical scope of the proposed volume reflects the continuing relevance of the topic within current architectural scholarship as an overarching notion The interdisciplinary essays are coherently grouped together in three thematic sections Revisiting Nationalism Interpreting Nationalism and Questioning Nationalism These chapters offer vignettes of the protean appearances of nationalism across nations and offer a basis of developing wider knowledge and critically situated understanding of the question beyond a singular nation s limited bounds
