Our Continent A Natural History Of North America:

Our Continent, 1979 Our Continent National Geographic Society (U.S.), 1976 **Our continent**, 1976 Wyoming Wildlife: A Natural History Paul Johnsgard, 2019-06-30 This book surveys Wyoming's mammal bird reptile and amphibian faunas. In addition to introducing the state's geography geology climate and major ecosystems it provides 65 biological profiles of 72 mammal species 195 profiles of 196 birds 9 profiles of 12 reptiles and 6 profiles of 9 amphibians. There are also species lists of Wyoming's 117 mammals 445 birds 22 reptiles and 12 amphibians. Also included are descriptions of nearly 50 national and state properties including parks forests preserves and other public access natural areas in Wyoming. The book includes a text of more than 150 000 words nearly 700 references a glossary of 115 biological terms nearly 50 maps and line drawings by the author and 33 color photographs by Thomas D Mangelsen Our Natural History Daniel B. Botkin, 2004 In retracing the steps of Lewis and Clark Botkin reveals what this western landscape actually looked like and how much it's been changed by modern civilization and technology *The Birds of Nebraska* Paul Johnsgard, 2018-07-06 This annotated list of the birds of Nebraska grew gradually out of research associated with my writing of the *Birds of the Great Plains Breeding Species and Their Distribution* Johnsgard 1979a. It expands and updates an earlier version that was published in 2013 by the University of Nebraska Lincoln Libraries DigitalCommons. Zea Books Johnsgard 2013a. It has been updated and modified in its current revision to conform with the most recent 2017 major revision of the American Ornithologists Society's Checklist of North American Birds Chesser et al 2017. It has also been modified in its current revision to conform very closely to the most recent Official List of the Birds of Nebraska by the Nebraska Ornithologists Union Gubanyi 1997 and later supplements in the *Nebraska Bird Review* to 84 138 150. The NOU's official state list of birds 461 species as of 2017 is based on actual specimen evidence or some other convincing basis of each species proven occurrence in the state. That list includes 337 regular species 29 casual species 90 accidental species and 5 extinct or extirpated species. In this edition I have classified 368 of the 461 species of Nebraska birds as ranging in relative frequency of occurrence as abundant to rare. There are also 61 species considered to be of accidental occurrence having been reliably reported in Nebraska no more than five times 20 that are considered extremely rare or very rare if reported from six to 25 times. There are also three extinct four extirpated and five unsuccessfully introduced species. Thirteen hypothetical species of dubious origin or identification are mentioned parenthetically. The text includes more than 123 000 words nearly 200 literature references and 19 pages of drawings and maps *Stephen Jay Gould* Warren D. Allmon, Patricia Kelley, Robert Ross, 2009 Considered by many during his lifetime as the most well known scientist in the world Stephen Jay Gould left an enormous and influential body of work.
