Richard Rorty and the Problem of Postmodern Experience Tobias Timm, 2019-07-05 Richard Rorty perhaps the most important philosopher of the past century refused to write meaningfully about experience due to his postmodern inclination to associate experience with a belief in objectivity and foundational truths Richard Rorty and the Problem of Postmodern Experience A Reconstruction explores the context reasoning and consequences of this resistance While for much of our history experience was valued for its potential to teach us about the world Rorty and his fellow postmodern thinkers encouraged us to doubt the narrative that we can use experience to make epistemological progress Rather than pursue universal truths about the world Rorty suggested that we recognize all of our beliefs about the world as being social constructions In his project to recover a concept of experience from within the framework Rorty has constructed Tobias Timm describes how classical pragmatist theories of experience are naïve about the problem of foundationalism He also explains how the most common phenomenological work lacks an active subject experience here is simply something that happens to us rather than something we actively seek to improve Timm demonstrates that despite Rorty's insistence that we talk about language instead of experience there are strong experiential elements in his work Rorty's romanticism and his optimism about the accomplishments of western culture are remedial to the pessimism of postmodern discussions about experience

Revival: An Outline of Psychology (1968) Willam McDougall, 2018-05-08 The time has gone by when any one man could hope to write an adequate text book of psychology The science has now so many branches so many methods so many fields of application and such an immense mass of data of observation is now on record that no one man can hope to have the necessary familiarity with the whole But even when a galaxy of learning and talent shall have written the text book of the future there will still be need for the book which will introduce the student to his science which will aim at giving him at the outset of his studies a profitable line of approach a fruitful way of thinking of psychological problems and a terminology as little misleading as possible The present volume is designed to render these services

Twentieth-Century Western Philosophy of Religion 1900-2000 Eugene Thomas Long, 2012-12-06 In the fall of 1994 Hendrik Jan van Leusen an acquisitions editor from Kluwer Academic Publishers visited me in my home to discuss a proposal for a handbook in the philosophy of religion He reported that he had been talking about this with philosophers of religion at several universities and that the response to the idea had been quite favorable I suggested that given the different approaches to the philosophy of religion it might be good for him to meet with philosophers representing different philosophical traditions at an upcoming meeting of the Eastern Division of the American Philosophical Association Jude Dougherty Joseph Kockelmans Robert Neville William Rowe and Merold Westphal kindly agreed to attend that meeting They made many substantial and helpful suggestions and a summary of the discussions was sent to van Leusen Some months later he wrote to inquire whether I might consider editing the series and writing the first volume which was to provide a historical map of twentieth century western philosophy of religion Although I could imagine myself editing the series I was initially reluctant to undertake the task of writing a volume that would take me across the lines of many different philosophical traditions By coincidence I had been asked some months earlier to contribute an essay

on the philosophy of religion for a conference being held at the Catholic University of America on the general topic One Hundred Years of Philosophy How We Experience Modern Verse Eric Purchase,2023-03-31 Poetry moves us Sometimes a poem changes our life Then we analyze it as a cultural artifact with no special connection to us An extensive critical apparatus enables us to develop sophisticated interpretations but we dismiss as idiosyncratic even life changing experiences of poetry We need an apparatus to unfold our experience of reading poems into a more effective relationship with the world Modern poets in particular wrote prophetic verse for this purpose Archetypal psychology and phenomenology describe the soul that modern poetry moves in us Three prosodic mechanisms activate the psyche The polyphony of accentual and quantitative versification creates depth to lure the soul Aural images reshape the reader's stream of consciousness Readers follow the movement of blocks of verse across the expanse of the page with what Maurice Merleau Ponty terms the phenomenal body These mechanisms reach us at the collective level of consciousness and generate the power we need to solve big collective challenges such as race climate change and inequality *The Nursing Profession* Norma .L
