Our Family Tree An Evolution Story:

Our Family Tree Lisa Westberg Peters,2003 Relates the evolution of the family of mankind from single cells in the sea to human beings with big brains that wonder who we are

Choosing Our Religion Elizabeth Drescher,2016-03-01 To the dismay of religious leaders study after study has shown a steady decline in affiliation and identification with traditional religions in America By 2014 more than twenty percent of adults identified as unaffiliated up more than seven percent just since 2007 Even more startling more than thirty percent of those under the age of thirty now identify as Nones answering none when queried about their religious affiliation Is America losing its religion Or as more and more Americans choose different spiritual paths are they changing what it means to be religious in the United States today In Choosing Our Religion Elizabeth Drescher explores the diverse complex spiritual lives of Nones across generations and across categories of self identification such as Spiritual But Not Religious Atheist Agnostic Humanist just Spiritual and more Drawing on more than one hundred interviews conducted across the United States Drescher opens a window into the lives of a broad cross section of Nones diverse with respect to age gender race sexual orientation and prior religious background She allows Nones to speak eloquently for themselves illuminating the processes by which they became None the sources of information and inspiration that enrich their spiritual lives the practices they find spiritually meaningful how prayer functions in spiritual lives not centered on doctrinal belief how morals and values are shaped outside of institutional religions and how Nones approach the spiritual development of their own children These compelling stories are deeply revealing about how religion is changing in America both for Nones and for the religiously affiliated family friends and neighbors with whom their lives remain intertwined

Evolution Education in the American South Christopher D. Lynn,Amanda L. Glaze,William A. Evans,Laura K. Reed,2017-03-08 This volume reaches beyond the controversy surrounding the teaching and learning of evolution in the United States specifically in regard to the culture politics and beliefs found in the Southeast The editors argue that despite a deep history of conflict in the region surrounding evolution there is a wealth of evolution research taking place from biodiversity in species to cultural evolution and human development In fact scientists educators and researchers from around the United States have found their niche in the South where biodiversity is high culture runs deep and the pace is just a little bit slower

Neanderthals in the Classroom Elizabeth Watts,2019-10-08

Neanderthals in the Classroom examines the ongoing battle surrounding evolution from a cultural and historical perspective and then puts Theodosius Dobzhansky's claim that nothing in biology makes sense except in the light of evolution to the ultimate test by exploring the potential evolutionary roots of this societal and educational clash over human origins. In examining the biological roots of the conflict, Watts demonstrates how understanding our inner Neanderthal allows us to consciously choose more highly evolved forms of communication as a means of alleviating societal division and creating space for more effective science education. Key Features: Introduces readers to the multifaceted world of evolution education. Describes the complex interplay between religious beliefs and science as well as the clash of false information and formal education. Offers an overview of the transformation of public opinion of evolution and science over time in the United States due to the perceived conflict between science and religion. Examines students' misconceptions about the theory of evolution and the general nature of scientific discovery due to the contradictory messages that they receive in popular culture. Offers potential means to amend misconceptions so that students and other individuals can integrate evolutionary theory into their worldviews regardless of their religious background. Long ago a strong wind blew. It blew people like seeds to a new land. The wind blew in a girl and her clan where herds of mammoths still wandered the frozen tundra. It later blew a boy and his family across frigid waters and they spread across the new land. Over time the wind continued to disperse newcomers from all directions. It blew in men who hoped to find gold and slave ships and immigrant families. And so it continued for generations and generations. Here is a moving and tender picture book that beautifully examines centuries of North American history and its people. *Paleolithic-Agricultural Revolution* Terri
