This report the fifth in the series examines the progress towards achieving the six Education for All EFA goals set at the World Education Forum in Dakar in 2000 focusing on the provision of comprehensive early childhood care and education particularly for the most disadvantaged children Programmes that support young children during the years before they go to primary school encompassing care health and nutrition issues as well as education are crucial to establishing strong foundations for subsequent learning and development The report finds that demand for early education and care is expanding rapidly spurred on by higher numbers of women in the labour market and more single parent households However young children in greatest need who also stand to benefit the most are unlikely to have access to early years programmes with coverage remaining very low in most developing countries Participation in pre school services ranges from 62 per cent in Latin America and the Caribbean to 35 per cent in developing countries of East Asia and the Pacific 32 per cent in South and West Asia 16 per cent in the Arab States and 12 per cent in Sub Saharan Africa In comparison pre school provision is almost universal in most Western European countries and although enrolments fell sharply in transition countries following the break up of the Soviet Union they are now recovering Although there has been considerable progress made in other aspects of the EFA goals particularly in relation to universal primary education more girls attending schools and an increase in international aid for education the report highlights the major challenges that remain if the six EFA goals are to be met by 2015 The Social Studies Professional ,2007
