**Reconsidering REDD+** Julia Dehm, 2021-06-03 In *Reconsidering REDD Authority Power and Law in the Green Economy* Julia Dehm provides a critical analysis of how the Reducing Emissions from Deforestation and Forest Degradation REDD scheme operates to reorganise social relations and to establish new forms of global authority over forests in the Global South in ways that benefit the interests of some actors while further marginalising others In accessible prose that draws on interdisciplinary insights Dehm demonstrates how through the creation of new legal relations including property rights and contractual obligations new forms of transnational authority over forested areas in the Global South are being constituted This important work should be read by anyone interested in a critical analysis of international climate law and policy that offers insights into questions of political economy power and unequal authority

**The Devouring Dragon** Craig Simons, 2025-06-25 China's rise is assaulting the natural world at an alarming rate In a few short years China has become the planet's largest market for endangered wildlife its top importer of tropical trees and its biggest emitter of greenhouse gases Its rapid economic growth has driven up the world's very metabolism in Brazil farmers clear large swaths of the Amazon to plant soybeans Indian poachers hunt tigers and elephants to feed Chinese demand in the United States clouds of mercury and ozone drift earthward after trans Pacific jet stream journeys Craig Simons The Devouring Dragon looks at how an ascending China has rapidly surpassed the U S and Europe as the planet's worst polluting superpower It argues that China's most important 21st century legacy will be determined not by jobs corporate profits or political alliances but by how quickly its growth degrades the global environment and whether it can stem the damage Combining in depth reporting with wide ranging interviews and scientific research The Devouring Dragon shines a spotlight on how China has put our planet's forests wildlife oceans and climate in jeopardy multiplying the risks for everyone in our burgeoning increasingly busy world

**Sustainable management of logged tropical forests in the Caribbean to ensure long-term productivity** Gräfe, S., Köhl, M., Eckelmann, C.M., Bremner, Q., Oatham, M., Pacheco, R., Playfair, M., Shono, K., 2021-09-01 To facilitate sustainable management of logged forests in the Caribbean forest authorities of Belize Guyana Suriname and Trinidad and Tobago jointly with the Food and Agriculture Organization of the United Nations and the University of Hamburg as a scientific partner implemented the regional project Ensuring Long Term Productivity of Lowland Tropical Forests in the Caribbean financed by the German Federal Ministry of Food and Agriculture The main objective of the project was to support the sustainable management of logged forests to maintain productivity and prevent further degradation For this purpose extensive field studies were conducted in the project countries which resulted

in silvicultural recommendations presented in this publication The project findings revealed that the application of general sustainable forest management protocols for tropical production forests that set limits on harvesting does not necessarily ensure sustained productivity if the composition and management of the residual stand are not considered The ratio of the number of harvested trees to the remaining future crop trees can provide a simple indicator of the sustainability of harvest If the current harvest exceeds the number of future crop trees the harvest is not sustainable As a rule of thumb at least one preferably two future crop trees per harvested tree should be retained for future use Protection of future crop trees can be a simple and practical approach to prevent high grading and degradation of the forest growing stock The importance of reduced impact logging to reduce unnecessary damage to the future crop trees and for sustainable forest management in general is stressed The Forest Worker ,1925 **Living in the Appalachian Forest** Chris Bolgiano,2002 A thought provoking look at how man and nature co exist somewhat uneasily within the Appalachian Forest the world s most diverse temperate woodlands 80 percent of which is privately owned by the ancestors of homesteaders outsiders who have bought large and small tracts absentee landlords and landowners private groups and institutions and giant corporations Interviews with a diverse group of landowners a horse logger a selective cutter a ginseng grower a clear cutter a forest steward a summer camp owner and others and the author s own experiences as a landowner illustrate the private forest s past present and future **World Forests, Markets and Policies** Matti Palo,J. on the range of underlying causes continue The premise is that studying successful transitions from deforestation to sustainable forestry ex post in Finland can provide novel insights into how deforestation in the tropics might be reduced in the future Our fundamental question here is why Finland succeeded to stop deforestation for a century ago and why not the same is feasible in the contemporary tropical countries This book presents a novel integrated theory within which this case study on Finland and contemporary modeling of underlying causes of tropical deforestation are developed Finland remains the world's second largest net exporter of forest products while maintaining the highest forest cover in Europe A transition from deforestation to sustainable industrial forestry took place in Finland during the first part of the 20th century The underlying causes of this transition are compared via our theory with deforestation in 74 contemporary tropical countries Both appear similar and support our theory The interaction of public policies and market institutions has appeared to be critical during this transition The study's findings suggest that private forest ownership with a continuous increase in the real value of forests and alleviation of poverty under non corruptive conditions has been a necessary but not a sufficient condition for this transition In a parallel way public policies have also proved to be a necessary but not sufficient condition in this transition The conclusion is that socialistic forestry along with corruption is artificially maintaining too low values in the tropical forests The opportunity cost of sustainable forestry remains too high and deforestation by extensification of agriculture therefore continues The prevailing socialistic forestry with dominating public forest ownership is by purpose maintaining administratively set low stumpage prices leading to low value of forests wide corruption and continuous forest degradation and deforestation An effective remedy to raise the value of forests is found to be within forestry Pamphlets on Conservation of Natural Resources ,1956 Drumbeats from Mescalero H. Henrietta Stockel,2011-04-07 Wisdom from the past hope for the future In 1945 the hot wind from a nuclear explosion at Trinity Site on a nearby missile range raged across the Mescalero Apache Reservation in south central New Mexico killing hundreds of head of livestock and causing sickness among the descendants of some of the most famous Apache heroes in American history In many ways this disaster typified what these Apaches had come to expect from the federal government attention was often accompanied by undesired results Four thousand Apaches of the Mescalero Chiricahua and Lipan bands now live on this reservation In twelve remarkable oral history interviews three generations of Mescalero Chiricahua and Lipan Apaches reflect on the trials of the past the challenges of the present and hope for the future A common thread among all of the interviewees is a collective memory of their people as formidable enemies of the U S government in the not too distant past Author and ethnographer H Henrietta Stockel has structured these interviews to encompass three groups of Mescalero Apache society the elders the warriors middle aged and the horseholders or young apprentices
