Our Homes:

Our Homes, and how to Make Them Healthy Sir Shirley Forster Murphy, Robert Brudenell Carter, 1883

Environmental Impact Statement, 1996 *Timber Home Living*, 1998 Timber Home Living introduces and showcases the beauty and efficiency of timber homes to an eager custom home buying audience The magazine's inspiring photography informative editorial quality advertising and essential resources involves and encourages readers to pursue their dream home **Log Home Living**, 1998-01 Log Home Living is the oldest largest and most widely distributed and read publication reaching log home enthusiasts For 21 years Log Home Living has presented the log home lifestyle through striking editorial photographic features and informative resources For more than two decades Log Home Living has offered so much more than a magazine through additional resources shows seminars mail order bookstore Web site and membership organization That's why the most serious log home buyers choose Log Home Living *Multimodal Studies* Kay O'Halloran, Bradley Smith, 2012-05-22 The phenomenon of multimodality has as Jewitt observes generated interest across many disciplines against the backdrop of considerable social change Contemporary societies are grappling with the social implications of the rapid increase in sophistication and range of multimodal practices particularly within interactive digital media so that the study of multimodality also becomes essential within an increasing range of practical domains As a result of this increasing interest in multimodality scholars teachers and practitioners are on the one hand uncovering many different issues arising from its study such as those of theory and methodology while also exploring multimodality within an increasing range of domains Such an increase and range of interest in multimodality heralds the emergence of a distinct multimodal studies field as both the mapping of a domain of enquiry and as the site of the development of theories descriptions and methodologies specific to and adapted for the study of multimodality The present volume presents a range of works by an impressive international roster of contributors who both explore issues arising from the study of multimodality and explore the scope of this emerging field within specific domains of multimodal phenomena Contributors aim to show that each individual work and works in general within multimodal studies represent a dialectic or complementarity between the exploration of issues of general significance to multimodal studies and the exploration of specific domains of multimodality while characterizing specific works as tending to some degree towards one or other of these main areas of focus Such a characterization is seen as part of a move towards the identification and thus development of a distinct field of multimodal studies **Housing Reclaimed** Jessica Kellner, 2011-10-01 How to build community reduce waste and create affordable unique homes Housing is a fundamental human right For most of human history our homes were built by hand from whatever local materials were available However since the Industrial Revolution most housing has become little more than quickly constructed mass produced uniform boxes At the same time the invention and standardization of the thirty year mortgage and our ever increasing reliance on credit has come to mean that most of us never own our homes outright Housing

Reclaimed is a call to arms for nonconventional home builders. It examines how technological advances, design evolution, and resourceful out-of-the-box thinking about materials and efficiency can help us meet the challenge of building affordable, environmentally friendly, beautiful, and unique homes. Focusing on the use of salvaged and reclaimed materials, this inspirational volume is packed with case studies of innovative projects including Phoenix Commotion working together towards low-income home ownership through sweat equity and 100 percent recycled materials; HabeRae revitalizing neighborhoods by creating urban infill using modern technology and sustainable and reclaimed materials; Builders of Hope rescuing and rehabilitating whole houses slated for demolition. These projects and others like them demonstrate that building one's own home does not have to be an unattainable dream. This beautifully illustrated guide is a must-read for anyone interested in creating quality, zero- or low-debt housing, reducing landfill waste, and creating stronger communities. Jessica Kellner is the editor of Natural Home and Garden magazine and a passionate advocate of using architectural salvage to create aesthetically beautiful, low-cost housing.

Log Home Living, 1987. Log Home Living is the oldest, largest, and most widely distributed and read publication reaching log home enthusiasts. For 21 years, Log Home Living has presented the log home lifestyle through striking editorial, photographic features, and informative resources. For more than two decades, Log Home Living has offered so much more than a magazine through additional resources, shows, seminars, mail-order bookstore, Web site, and membership organization. That's why the most serious log home buyers choose Log Home Living.

Warm House. Olivia Parker, 2024-10-15. Warm House: Efficient Heating Solutions for Every Budget tackles the crucial challenge of maintaining a comfortable home temperature while considering both financial and environmental impacts. This comprehensive guide explores a range of heating methods from cost-effective solutions to high-end technologies, emphasizing energy efficiency and sustainability. The book's unique approach combines technical knowledge with practical advice, making it accessible to a wide audience. Readers will discover the fascinating evolution of home heating from ancient Roman hypocausts to modern smart thermostats, providing context for current heating practices. The book's structure progresses logically, starting with fundamental concepts like heat loss and insulation, then moving to budget-friendly solutions such as DIY weatherization, and finally exploring advanced options like geothermal heat pumps. Throughout, Warm House emphasizes that effective heating is achievable at any budget through a combination of smart choices and strategic investments. What sets this book apart is its holistic perspective, considering not just technical aspects but also human behaviors that influence energy consumption. By incorporating insights from architecture, environmental science, and psychology, Warm House offers readers a comprehensive toolkit for creating warm, efficient, and sustainable living spaces regardless of their financial constraints.
