Political Centers and Cultural Regions Barrie M. Morrison, 1970 Political Centres and Cultural Regions in Early Bengal Barrie M. Morrison, 1970 **The Rise of Islam and the Bengal Frontier, 1204-1760** Richard M. Eaton, 1993 Eaton ranges over all the important aspects of that community's history whether political and social or cultural and religious This study must rank among the finest contributions to South Asian scholarship to appear for some while Culinary Culture in Colonial India Utsa Ray, 2015-01-05 This book utilizes cuisine to understand the construction of the colonial middle class in Bengal who indigenized new culinary experiences as a result of colonial modernity This process of indigenization developed certain social practices including imagination of the act of cooking as a classic feminine act and the domestic kitchen as a sacred space The process of indigenization was an aesthetic choice that was imbricated in the upper caste and patriarchal agenda of the middle class social reform However in these acts of imagination there were important elements of continuity from the pre colonial times The book establishes the fact that Bengali cuisine cannot be labeled as indigenist although it never became widely commercialized The point was to cosmopolitanize the domestic and yet keep its tag of Bengalianness The resultant cuisine was hybrid in many senses like its makers *Cultural Politics of Translation* Alamin M. Mazrui, 2016-02-19 This book is the first full length examination of the cultural politics at work in the act of translation in East Africa providing close critical analyses of a variety of texts that demonstrate the myriad connections between translation and larger socio political forces Looking specifically at texts translated into Swahili the book builds on the notion that translation is not just a linguistic process but also a complex interaction between culture history and politics and charts this evolution of the translation process in East Africa from the pre colonial to colonial to post colonial periods It uses textual examples including the Bible the Qur'an and Frantz Fanon's *Wretched of the Earth* from five different domains religious political legal journalistic and literary and grounds them in their specific socio political and historical contexts to highlight the importance of context in the translation process and to unpack the complex relationships between both global and local forces that infuse these translated texts with an identity all their own This book provides a comprehensive portrait of the multivalent nature of the act of translation in the East African experience and serves as a key resource for students and researchers in translation studies cultural studies post colonial studies African studies and comparative literature *The Economic History of India*, 2023-07-30 The economic history of early India is a rich and diverse area of study covering agricultural developments trade markets occupation and professional groups urbanization and the institutions that govern the economy Recent research has expanded our understanding of the processes of transformation of the economy in different temporal contexts within the Indian sub continent They have particularly led us to explore connected histories given the trans continental trading networks and movements of people from very early times This volume seeks to draw attention to this vast and unexplored terrain in the economic history of early India by bringing together essays on a new and rich

historiography Essays in the volume cover neglected regions economic processes and structures Scholars have looked at questions of settlements crops that were cultivated and market orientation Essays cover material culture and provide insights into how early Indians lived what kinds of activities they were engaged in and how they organised their production activities within and outside domestic spaces Further the volume bring new insights on hierarchy of settlement types nature of exchange and the significance of a nodal site in exchange networks Maritime history as well as the understanding of trade in its varied forms and manifestations are covered in several essays Catalog of Copyright Entries. Des Forges,2003 The Ming period of Chinese history is often depicted as one of cultural aridity political

despotism and social stasis Recent studies have shown that the arts continued to flourish government remained effective people enjoyed considerable mobility and China served as a center of the global economy This study goes further to argue that China s perennial quest for cultural centrality resulted in periodic political changes that permitted the Chinese people to retain control over social and economic developments The study focuses on two and a half million people in three prefectures of northeast Henan the central province in the heart of the central plain a common synecdoche for China The author argues that this population may have been more representative of the Chinese people at large than were the residents of more prosperous regions Many diverse individuals in northeast Henan invoked historical models to deal with the present and shape the future Though they differed in the lessons they drew they shared the view that the Han dynasty was particularly

relevant to their own time Han and Ming politics were integral parts of a pattern of Chinese historical development that has lasted to the present

An Introduction to Literary Geography Daxing Zeng, 2025-09-26 This book the first introductory work of Literary Geography Studies in China justifies literary geography as a discipline running in parallel with literary theory literary criticism and literary history Zeng argues that Literary Geography Studies is a subdiscipline of literary studies rather than an interdisciplinary field or a subfield of geography Zeng believes that in Literary Geography Studies the theories and methodologies of geography are adopted to solve problems in literary studies rather than problems in geography The book has for the first time set up a theoretical framework for Literary Geography Studies as a secondary discipline It has consequently structured the disciplinary knowledge covering topics such as the research object research methodology geographical influence upon literary production geographical distribution of writers geographical space in literary works literary landscapes literary regionality and critical literary geography This framework will be an invaluable tool to future scholars of Literary Geography Studies as it provides a systematic and detailed overview of the field something that is currently lacking in English language publications In addition the book derives its philosophy from ancient Chinese culture and establishes an innovative theoretical framework for Literary Geography Studies based on abundant examples from ancient Chinese literature thus making a significant contribution to the existing literary studies by increasing a geo spatial understanding of ancient Chinese literature
