Public Monuments Art In Political Bondage 18701997:

Public Monuments Sergiusz Michalski, 1998-12 Public monuments to significant individuals or to political concepts are familiar to most of us but the notions underlying them may not be so obvious This book traces the history of the public monument from the 1870s to the present day *Holocaust Monuments and National Memory Cultures in France and Germany Since 1989* Peter Carrier, 2005 Since 1989 two sites of memory with respect to the deportation and persecution of Jews in France and Germany have received intense public attention the Ve d Hiv in Paris and the Monument for the Murdered Jews of Europe in Berlin Why is this so Both monuments the author argues are unique in the history of memorial projects

Artistic Citizenship Mary Schmidt Campbell, Randy Martin, 2006-06-21 This volume identifies the question of artistic citizenship to explore civic identity Featuring contributions from experts in the field this book is indispensable to anyone involved in arts education or the creation of public policy for the arts *The Monument of Tomorrow* Miguel Caballero, 2025-07-15 Rupture iconoclasm and tabula rasa are concepts commonly used to describe the approach to cultural heritage associated with the avant garde and revolutionary politics during the early twentieth century Highlighting artists and radical intellectuals who worked to protect public monuments in 1910 1950s Spain The Monument of Tomorrow challenges the persistent narrative imposed by Francoism of an iconoclastic Second Republic in Spain Author Miguel Caballero draws on a wide range of sources to examine how artists architects writers and activists transformed monument and heritage conservation into a progressive experimental cause in their fight against fascism During the Spanish War with its devastating air raids these individuals were motivated by the defense of culture to become determined conservationists Caballero s research incorporates surviving monuments architectural plans propaganda posters and literary works including novels plays and poetry The war became a laboratory for experiments in conserving and redefining monuments and national heritage Modernist style protective structures for example were built atop Madrid s historic monuments including statues of Cybele Neptune and Phillip III in Plaza Mayor Such innovations later influenced strategies for safeguarding monuments during the Second World War This history Caballero argues makes the Spanish War pivotal to development of the concept of World Heritage Ultimately The Monument of Tomorrow demonstrates that heritage conservation does not have to be politically conservative Those interested in anti fascism art history modern architecture modernism cultural heritage conservation and preservation Iberian studies and war studies should find valuable insights in this innovative original work

Commemorating and Forgetting Martin J. Murray, 2013-04-25 When the past is painful as riddled with violence and injustice as it is in postapartheid South Africa remembrance presents a problem at once practical and ethical how much of the past to preserve and recollect and how much to erase and forget if the new nation is to ever unify and move forward The new South Africa s confrontation of this dilemma is Martin J Murray s subject in *Commemorating and Forgetting* More broadly this book explores how collective memory works how framing events persons and places worthy of recognition and

honor entails a selective appropriation of the past not a mastery of history How is the historical past made to appear in the present In addressing these questions Murray reveals how collective memory is stored and disseminated in architecture statuary monuments and memorials literature and art landscapes of remembrance that selectively recall and even fabricate history in the service of nation building He examines such vehicles of memory in postapartheid South Africa and parses the stories they tell stories by turn sanitized distorted embellished and compressed In this analysis Commemorating and Forgetting marks a critical move toward recognizing how the legacies and impositions of white minority rule far from being truly past remain embedded in intertwined with and imprinted on the new nation s here and now *Art and War* Laura Brandon,2012-11-25 This is a truly encyclopedic survey of artists responses both official and personal to the horrors of war Art and War reveals the sheer diversity of artists portrayals of this most devastating aspect of the human condition from the heroic paintings of Benjamin West and John Singer Sargent to brutal and iconic works by artists from Goya to Picasso and the equally oppositional work of Leon Golub Nancy Spero and others who reacted with fury to the Vietnam War Laura Brandon pays particular attention to work produced in response to World War I and World War II as well as to more recent art and memorial work by artists as diverse as Barbara Kruger Alfredo Jarr and Maya Lin She looks finally to the reactions of contemporary artists such as Langlands and Bell to the US invasion in 2001 of Afghanistan and the War on Terror

Iconoclasm Stacy Boldrick,2017-07-05 The word iconoclasm is most often used in relation to sculpture because it is sculptures that most visibly bear witness to physical damage But damage can also be invisible and the actions of iconoclasm can be subtle and varying Iconoclastic acts include the addition of objects and accessories as well as their removal or may be represented in text or imagery that never materially affects the original object This book brings together a collection of essays each of which fundamentally questions the meaning of the word iconoclasm as a descriptive category Each contribution examines the impact of iconoclastic acts on different representational forms and assesses the development and historical implications of these various destructive and transformative behaviours **Beyond Imagined Uniqueness**

William Glass,2010-08-11 *Beyond Imagined Uniqueness* Nationalisms in Comparative Perspectives is a collection of essays from a variety of disciplines and theoretical perspectives that explore the contentious issue of nationalism in historical and contemporary settings They adopt an interdisciplinary approach to the topic of nationalism and its permutations and modes of expression The unspoken context of these essays is the trends subsumed under the processes of globalization Though the world may be becoming more integrated economically these essays suggest social cultural and political forces historically rooted keep the nation and national identity alive and well The comparative perspectives offered by the essays appear in two ways one set is the explicit comparisons of nations made by several authors within their essays and between the essays themselves when the authors focus on developments within a single nation A second and indeed more thought provoking set of comparisons come from the way the essays address nationalism in disparate scholarly approaches that include visual

culture history sociology and literature Moreover while traditional themes in the study of nationalism are not ignored these essays expand the discussion with case studies of nationalism in Turkey Asia and Eastern Europe Even when nationalism is considered in those areas that have been the central focus of nationalism studies Western Europe and the USA the authors bring unique voices to the conversation as in the use of portraiture as a vehicle of nationalism in Cold War America or children s literature shaping a Swedish American identity or in the idea of a covenant as a source of Dutch nationalism or the role of minority languages in West European societies Section One of this volume contains essays that examine the terrain of the national imaginary through language monuments and visual culture Several of the essays in this traverse the cultural sites of representation and commemoration of the nation looking carefully at the politics of memory in places material objects and texts Section Two provides more individual case studies of nations though many of these essays engage significant regional and international tensions especially in a post Cold War world that has often influenced the internal dynamics of nation building Section Three moves the focus away from the nation to immigrant communities especially those in the United States Canada and the Caribbean Diasporas throughout the world have challenged many theories about the nation as crossing borders becomes the norm rather the exception Artistic Citizenship John W. Graham,Wendy C. Havlick,1994-06-06 First published in 1994 Mission Statements A Guide to the Corporate and Nonprofit Sectors offers the most exciting opportunities for advancing the study of organization direction in the four decades that it has been actively pursued The Political Economy of Art Julie F. Codell,2008 Political economy is defined in this volume as collective state or corporate support for art and architecture in the public sphere intended to be accessible to the widest possible public raising questions about the relationship of the state to cultural production and consumption This collection of essays explores the political economy of art from the perspective of the artist or from analysis of art s production and consumption emphasizing the art side of the relationship between art and state This volume explores art as public good a central issue in political economy Essays examine specific cultural spaces as points of struggle between economic and cultural processes Essays focus on three areas of conflict theories of political economy put into practices of state cultural production sculptural and architectural monuments commissioned by state and corporate entities and conflicts and critiques of state investments in culture by artists and the public amazon com edit desc
