Baumgartner,2021-11-11 A central question in political representation is whether government responds to the people To understand that we need to know what the government is doing and what the people think of it We seek to understand a key question necessary to answer those bigger questions How does American public opinion move over time We posit three patterns of change over time in public opinion depending on the type of issue Issues on which the two parties regularly disagree provide clear partisan cues to the public For these party cue issues we present a slight variation on the thermostatic theory from Soroka and Wlezien 2010 Wlezien 1995 our implied thermostatic model A smaller number of issues divide the public along lines unrelated to partisanship and so partisan control of government provides no relevant clue Finally we note a small but important class of issues which capture response to cultural shifts **Ideology in America** Christopher
