Published Essays Eric Voegelin, 2003 Eric Voegelin 1901 1985 was one of the most original and influential philosophers of our time Born in Cologne Germany he studied at the University of Vienna where he became a professor of political science in the Faculty of Law In 1938 he and his wife fleeing Hitler immigrated to the United States They became American citizens in 1944 Voegelin spent much of his career at Louisiana State University the University of Munich and the Hoover Institution at Stanford University During his lifetime he published many books and more than one hundred articles The Collected Works of Eric Voegelin will make available in a uniform edition all of Voegelin s major writings In some thirty four volumes the Collected Works will include the monumental never before published History of Political Ideas important published essays not previously collected in book form or published only in German previously unpublished essays selected correspondence translations of seven books four of them never before available in English and the five volume Order and History

Published Essays, 1929-1933 Eric Voegelin, 2003 The Theory of Governance and Other Miscellaneous Papers, 1921-1938 Eric Voegelin, 2003 This first of two volumes of Voegelin s miscellaneous papers brings together crucial writings published for the first time from the early formative period of this scholar s thought The book begins with Voegelin s dissertation on sociological method completed under the direction of Othmar Spann and Hans Kelsen at the University of Vienna in 1922 It reveals an intimate knowledge of the writings of Georg Simmel and a skillful use of insights gained from Edmund Husserl s Logical Investigations and Ideas The dissertation and other smaller pieces written at this time addresses problems that remained of great importance to Voegelin throughout his life the relation of insight to language the structure of the human being and the human s spiritual center They disclose both Voegelin s theoretical reference points during these early years including the thought of Henri Bergson Othmar Spann Georg Simmel and Edmund Husserl as well the young scholar s remarkably independent approach to theoretical problems Moreover this volume includes a work that is fundamental to an understanding of Voegelin s theoretical development his extended study on the theory of governance written between 1930 and 1932 It follows the issues that confront political society to their roots in the soul and in the soul s relationship to the ground of being The Theory of Governance and Other Miscellaneous Papers presents a meditative exegetic study of texts from Augustine Descartes and Husserl early examples of the meditations that became central to Voegelin s later work Other essays included in this volume such as Theory of Law and Political Theory as Human Science develop these theoretical insights and refine Voegelin s methodological tools This volume will be of interest to all scholars of the work of Eric Voegelin and of the refoundation of political philosophy in the twentieth century in general **The Collected Works of Eric Voegelin** Eric Voegelin, 1989 **The Historical Mind** Justin D. Garrison, Ryan R. Holston, 2020-05-01 America is increasingly defined not only by routine disregard for its fundamental laws but also by the decadent character of its political leaders and citizens widespread consumerism and self indulgent behavior cultural

hedonism and anarchy the coarsening of moral and political discourse and a reckless interventionism in international relations In *The Historical Mind* various scholars argue that America's problems are rooted in its people's refusal to heed the lessons of historical experience and to adopt constitutional checks or self-imposed restraints on their cultural moral and political lives Drawing inspiration from the humanism of Irving Babbitt and Claes G Ryn the contributors offer a timely and provocative assessment of the American present and contend that only a humanistic order guided by the wisdom of historical consciousness has genuine promise for facilitating fresh thinking about the renewal of American culture morality and politics

The Eric Voegelin Reader Charles R. Embry, Glenn Hughes, 2017-10-20 By the time Eric Voegelin fled Hitler's regime and made his way to the United States in 1938 he had already written four books criticizing Nazi racism establishing what would be the focus of his life's work to account for the endemic political violence of the twentieth century One of the most original political philosophers of the period Voegelin has largely avoided ideological labels or categorizations of his work Because of this however and because no one work or volume of his can do justice to his overall project his work has been seen as difficult to approach Drawing from the University of Missouri Press's thirty-four volume edition of *The Collected Works of Eric Voegelin* 1990-2009 Charles Embry and Glenn Hughes have assembled a selection of representative works of Voegelin satisfying a longstanding need for a single volume that can serve as a general introduction to Voegelin's philosophy The collection includes writings that demonstrate the range and creativity of Voegelin's thought as it developed from 1956 until his death in 1985 in his search for the history of order in human society The Reader begins with excerpts from *Autobiographical Reflections* 1973 which include an orienting mixture of biographical information philosophical motivations and the scope of Voegelin's project It reflects key periods of Voegelin's philosophical development pivoting on his flight from the Gestapo The next section focuses on Voegelin's understanding of the contemporary need to re-ground political science in a non-positivistic post-Weberian outlook and method It begins with Voegelin's historical survey of science and scientism followed by his explanation of what political science now requires in his introduction to *The New Science of Politics* Also included are two essays that exemplify the practice of this new science Voegelin started his academic career as a political scientist and these early essays indicate his wide philosophical vision Voegelin recognized that a fully responsible new science of politics would require the development of a philosophy of history This led to the writing of his magnum opus the five-volume *Order and History* 1956-1985 This section of the Reader includes his introductions to volumes 1, 2, and 4 and his most essential accounts of the theoretical requirements and historical scope of a philosophy of history adequate to present-day scholarship and historical discoveries In the course of his career Voegelin came to understand that political science political philosophy and philosophy of history must have as their theoretical nucleus a sound philosophical anthropology based on an accurate philosophy of human consciousness The next set of writings consists of one late lecture and four late essays that exemplify how Voegelin recovers the wisdom of classical philosophy and the Western religious tradition while

criticizing modern misrepresentations of consciousness The result is Voegelin's contemporary accounts of the nature of reason the challenge of truly rational discussion and the search for divine origins and the life of the human spirit During his philosophical journey Voegelin addressed the historical situatedness of human existence explicating the historicity of human consciousness in a manner that gave full due to the challenges of acknowledging both human immersion in the story of history and the ability of consciousness to arrive at philosophically valid truths about existence that are transhistorical The essays in this final section present the culmination of his philosophical meditation on history consciousness and reality

Eric Voegelin's Political Readings Bernat Torres, Josep Monserrat Molas, 2021-07-22 Eric Voegelin's Political Readings fills a critical void by providing an original approach to studying the work of Eric Voegelin one of the major political philosophers of the twenty first century Across six chapters experts guide the reader from classical to modern times presenting six political philosophers who have had an impact on the life and philosophical production of Eric Voegelin Philosophers examined include Plato Aristotle Saint Augustine Hobbes Weber and Kelsen Through this innovative structure the chapters collectively illustrate how Voegelin was an exceptional thinker through his engagement with political philosophers both modern and antique The plurality of unique academic perspectives and voices enriches our understanding of Voegelin's own thought while also encouraging a re think of ancient and modern thinkers and the transformation and continuity between these Designed for students and scholars alike Eric Voegelin's Political Readings will appeal to all those with an interest in Voegelin as well as readers familiar with classical and modern political philosophers

Voegelinian Readings of Modern Literature Charles R. Embry, 2011-05-16 The work of renowned thinker Eric Voegelin is largely rooted in his literary sensibility Voegelin's contributions to the field of philosophy grew from the depths of his knowledge of history's most important texts from ancient to modern times Many of the concepts he emphasized such as participatory experience and symbolization in philosophy have long been significant to literary criticism as well as philosophical study Voegelin himself even ventured into the field of criticism publishing a critical examination of Henry James's *The Turn of the Screw* in 1971 Since it is so strongly influenced by the written record of man's search for meaning Voegelinian thought makes an ideal framework for the study of twentieth century literature For Voegelinian Readings of Modern Literature scholar Charles R Embry has collected essays that consider particular pieces of literature in light of the philosopher's work These essays supply a theoretical grounding for the reading of novels poems and plays and reveal how the Voegelinian perspective exposes the existential and philosophical dimensions of the literary works themselves As a unit this collection of essays shows how modern pieces of literature can symbolize their creators participation in the human search for the truth of existence just as myths philosophical works and religious texts always have Voegelin's primary concern as a philosopher was to expose the roots of the disturbances of the modern era religious conflict imperialism war so that the sources of order leading to meaning are revealed The openness of Voegelinian thought and the many ways he considered the levels of reality

generate intriguing themes for literary criticism In these essays noted Voegelin scholars focus on American and European literary artists from the 1700s through the late twentieth century including Emily Dickinson Henrik Ibsen Thomas Carlyle D H Lawrence Marcel Proust and Hermann Broch While the intersection of the work of Eric Voegelin and literature has been a part of Voegelin scholarship for decades this book explores that relationship in an extended form Through a broad collection of thoughtful essays Voegelinian Readings of Modern Literature reveals how much Voegelin did to break down the barriers between literature and philosophy and makes an engaging contribution to Voegelin scholarship

Teaching in an Age of Ideology John von Heyking, Lee Trepanier, 2013 This volume explores the role of some of the most prominent twentieth century philosophers and political thinkers as teachers It examines how these teachers conveyed truth to their students against the ideological influences found in the university and society Philosophers from Edmund Husserl and Hannah Arendt to political thinkers like Eric Voegelin and Leo Strauss and their students such as Ellis Sandoz Stanley Rosen and Harvey Mansfield are in this volume as teachers who analyze denounce and attempt to transcend ideology for a more authentic way of thinking What the reader will discover is that teaching is not merely a matter of holding concepts together but a way of existing or living in the world The thinkers in this volume represent this form of teaching as the philosophical search for truth in a world deformed by ideology
