Pulmonary Circulation In The Critically Ill Patient Moving From Passive To Active Control:

Textbook of Pulmonary Rehabilitation Enrico Clini, Anne E. Holland, Fabio Pitta, Thierry Troosters, 2017-12-21 This book provides up to date knowledge on all aspects of the multidisciplinary approach to pulmonary rehabilitation that is essential in order to achieve optimal results. It will be an ideal resource especially for pulmonologists in training but will also be of value for physiotherapists, other health care professionals and technicians. Detailed information is presented on the diverse program components in pulmonary rehabilitation with clear explanation of the roles of the nutritionist, psychologist, occupational therapist, respiratory nurse and physical activity coach. Guidance is provided on identification of candidates for pulmonary rehabilitation and on all aspects of assessment including exercise capacity, muscle function and physical activity. Patient centered economic and other outcomes are examined with separate discussion of combined outcome assessment. Furthermore, due consideration is given to organizational aspects of pulmonary rehabilitation and to rehabilitation in specific scenarios e.g. thoracic oncology and surgery, transplantation and the ICU. The authors are internationally recognized experts selected for their expertise in the topics they discuss.

Post-Intensive Care Syndrome Jean-Charles Preiser, Margaret Herridge, Elie Azoulay, 2019-08-31 This book, part of the European Society of Intensive Care Medicine textbook series, provides detailed up to date information on the physical, cognitive and psychological impairments that are frequently present following a stay in an intensive care unit and examines in depth the available preventive and therapeutic strategies including adapted rehabilitation programs. Beyond acquainting readers with the multiple facets of post intensive care syndrome (PICS), the book aims to promote the effective follow up of patients thereby enhancing their ability to work and their functional autonomy and to identify risk factors for the development of PICS as a stimulus to beneficial organizational changes in intensive care departments. The background to the book is the realization by healthcare providers that the quality of life of patients who have required a stay in an intensive care unit can be severely impaired or even become unacceptable. All too often the diverse sequelae are overlooked by specialists of other disciplines. Moreover, families and caregivers are also at high risk of post traumatic stress disorder and depression. The European Society of Intensive Care Medicine has developed the Lessons from the ICU series with the vision of providing focused and state of the art overviews of central topics in Intensive Care and optimal resources for clinicians working in Intensive Care. This book, written by renowned experts in the field, will facilitate the transmission of key knowledge with significant clinical and financial benefits.

Apley and Solomon's Concise System of Orthopaedics and Trauma, Fourth Edition Louis Solomon, David J. Warwick, Selvadurai Nayagam, 2014-05-30 Apley and Solomon's Concise System of Orthopaedics and Trauma is firmly established as the leading introductory textbook of orthopaedic practice and the principles of fracture management.
