Purposive Biology:

Philosophical Problems of Modern Biology Jan Kamaryt, 1965 **Purposive Behaviour and Teleological Explanations** Frank Honywill George, Les Johnson, 1985 **Purposive Biology** Li-Kung Shaw, 1982 *The History and Theory of Vitalism* Hans Driesch, 1914 *Current Catalog* National Library of Medicine (U.S.), 1983 First multi year cumulation covers six years 1965 70 **The New Genesis** Ronald Cole-Turner, 1993-01-01 How should living things and our own human nature be changed in the hands of those who can alter them genetically How do we set limits and what goals are legitimate pursuits This book's contribution to a theological understanding of science and technology helps in showing how Christian theology can provide a solid framework for considering these issues *The Changing Role of the Embryo in Evolutionary Thought* Ron Amundson, 2005-03-14 In this book Ron Amundson examines two hundred years of scientific views on the evolution development relationship from the perspective of evolutionary developmental biology evo devo This perspective challenges several popular views about the history of evolutionary thought by claiming that many earlier authors had made history come out right for the Evolutionary Synthesis The book starts with a revised history of nineteenth century evolutionary thought It then investigates how development became irrelevant with the Evolutionary Synthesis It concludes with an examination of the contrasts that persist between mainstream evolutionary theory and evo devo This book will appeal to students and professionals in the philosophy and history of science and biology **Science in Modern Poetry** John Holmes, 2012-01-01 Over the last thirty years more and more critics and scholars have come to recognize the significant influence of science on literature This collection of essays focuses specifically on what poets in the twentieth and twenty first centuries have made of modern scientific developments In these twelve essays leading experts on modern poetry literature and science explore how poets have used scientific language in their poems how poetry can offer new perspectives on science and how the two cultures can and have come together in the work of poets from Britain Ireland America and Australia **Basic Structures of Reality** Colin McGinn, 2011-12-09 In *Basic Structures of Reality* Colin McGinn deals with questions of metaphysics epistemology and philosophy of mind from the vantage point of physics Combining general philosophy with physics he covers such topics as the definition of matter the nature of space motion gravity electromagnetic fields the character of physical knowledge and consciousness and meaning Throughout McGinn maintains an historical perspective and seeks to determine how much we really know of the world described by physics He defends a version of structuralism the thesis that our knowledge is partial and merely abstract leaving a large epistemological gap at the center of physics McGinn then connects this element of mystery to parallel mysteries in relation to the mind Consciousness emerges as just one more mystery of physics A theory of matter and space is developed according to which the impenetrability of matter is explained as the deletion of volumes of space McGinn proposes a philosophy of science that distinguishes physics from both psychology and biology explores the ontology of energy and considers the relevance of physics to seemingly remote

fields such as the theory of meaning In the form of a series of aphorisms the author presents a metaphysical system that takes laws of nature as fundamental With its broad scope and deep study of the fundamental questions at the heart of philosophy of physics this book is not intended primarily for specialists but for the general philosophical reader interested in how physics and philosophy intersect *Psychology of Religious Experience* Francis Lorette Strickland, 1924
