Re Framing The International Law Cultures Politics:

Reframing the International Richard Falk, R.B.J. Walker, Lester Ruiz, 2013-10-08 *Re Framing the International* insists that if we are to properly face the challenges of the coming century we need to re-examine international politics and development through the prism of ethics and morality. International relations must now contend with a widening circle of participants reflecting the diversity and unevenness of status, memory, gender, race, culture, and class. **Global Environmental**

Governance, Civil Society and Wildlife Margi Prideaux, 2017-03-16 The world is entering a period of unprecedented environmental and political change. By mid-century, climate change will cause dramatic ecosystem shifts. Hundreds if not thousands of species will disappear from the earth, including icons like polar bears, gorillas, Asiatic lions, and bluefin tuna. For many cultures, species are placed as our cultivated global community erodes. International triage decisions about species and local ecosystems will commence, and if we are not alert, these decisions will be made on our collective behalf without local perspective or accountability. *Global Environmental Governance: Civil Society and Wildlife* illuminates a clear pathway for the environmental non-governmental community to transition into a co-governance role. Many NGO diplomats have deeper experience and more technical knowledge about policy discussions than their government counterparts and are unburdened by sovereign constraints. The book puts forward the perspectives of developing world civil society and the case that it must play a more significant role in future decision making. Civil society from around the world must be welcomed by governments at the global environmental governance table if we are to hear birdsong after the storm. **Reframing the International**

Richard A. Falk, Lester Edwin J. Ruiz, R. B. J. Walker, 2002 **Foreigners, Refugees or Minorities?** Didier Bigo, 2016-04-15 When immigration policy and the treatment of Roma collide in international relations, there are surprising consequences which are revelatory of the underlying tensions between internal and external policies in the European Union. This book examines the relationship of citizenship, ethnicity, and international relations, and how these three aspects of the State, its people, and its neighbours relate to one another. It studies the wide issue of international relations, citizenship, and minority discrimination through the lens of the case study of European Roma who seek refugee status in Canada on account of their persecution in Europe. The volume assesses the relationships among citizenship, state protection, and persecution, and minority status, and how they can intersect with and destabilize foreign affairs. The central background to the book is the European treatment of Roma, their linkages with visa and asylum policies, and their human rights repercussions. The various contributions reveal how modern liberal democracies can find themselves in contradictory positions concerning their citizens when these are looking for protection abroad and foreigners in search of international protection as a consequence of visa and pre-border surveillance policies and practices. The International Criminal Court and National Courts Nidal Nabil Jurdi, 2016-03-03 This book analyzes the position of the ICC in relation to national court systems. The research illustrates that what seemed to be a straight forward relationship between the ICC and national courts under the complementarity

mechanism proves to be much more complex in practice Using the referrals of Uganda and Darfur the book demonstrates ways in which it might be possible to prosecute for crimes currently not prosecuted by the ICC and brings to light possible solutions to overcome the gaps in law and practice in the jurisdictional relation between the ICC and national systems It will be of value to academics students and policy makers working in the area of international law international organizations and human rights

Seeking Justice

in International Law Mauro Barelli, 2016-04-14 Today human rights represent a primary concern of the international legal system. The international community's commitment to the protection and promotion of human rights however does not always produce the results hoped for by the advocates of a more justice oriented system of international law. Indeed international law is often criticised for inter alia its enduring imperial character, incapacity to minimize inequalities and failure to take human suffering seriously. Against this background the central question that this book aims to answer is whether the adoption of the 2007 United Nations Declaration on the Rights of Indigenous Peoples points to the existence of an international law that promises to provide valid responses to the demands for justice of disempowered and vulnerable groups. At one level the book assesses whether international law has responded fairly and adequately to the human rights claims of indigenous peoples. At another level it explores the relationship between this response and some distinctive features of the indigenous peoples' struggle for justice, reflecting on the extent to which the latter have influenced and shaped the former. The book draws important conclusions as to the reasons behind international law's positive recognition of indigenous peoples' rights, shedding some light on the potential and limits of international law as an instrument of justice. The book will be of great interest to students and scholars of public international law, human rights and social movements.

Cultural Practices, Political Possibilities Rohee Dasgupta, 2009-03-26 Culture has long been regarded as one of the most complicated concepts in the social sciences, possibly over theorized. Its ubiquity, tangled senses of particularity and the almost universal recognition of that assumed particularity require an extended vocabulary for framing the politics embedded in it. Cultural Practices, Political Possibilities attempts to explain the political significance and overlaps of cultural constructions as witnessed in global, local, clashes, convergences of texts and contexts within the state and community, identity and the self. Through various case studies, concepts and interdisciplinary perspectives, the multinational group of authors from diverse academic backgrounds interprets cultural constructions of politics as factionalizing, identitarian, situational and particularistic in their links, affirmations and consequential divides. Each contribution in its unique way explores the performative asymmetries and contradictions witnessed in diverse cultural interactions that shape new areas of political investigation. The book will be welcomed by

Nick Vaughan-Williams, 2012-02-29 Presents a distinctive theoretical approach to the problem of borders in the study of International Relations It turns from the current debate regarding the presence or absence of borders to consider the fundamental change that is occurring in the concept *Interpreting International Politics* Cecelia Lynch, 2013-12-04 Interpreting International Politics addresses each of the major traditional subfields in International Relations International Law and Organization International Security and International Political Economy But how are interpretivist methods and concerns brought to bear on these topics In this slim volume Cecelia Lynch focuses on the philosophy of science and conceptual issues that make work in international relations distinctly interpretive This work both legitimizes and demonstrates the necessity of post and non positivist scholarship Interpretive approaches to the study of international relations span not only the traditional areas of security international political economy and international law and organizations but also emerging and newer areas such as gender race religion secularism and continuing issues of globalization By situating describing and analyzing major interpretive works in each of these fields the book draws out the critical research challenges that are posed by and the progress that is made by interpretive work Furthermore the book also pushes forward interpretive insights to areas that have entered the IR radar screen more recently including race and religion demonstrating how work in these areas can inform all subfields of the discipline and suggesting paths for future research

International Development Nelson W. Keith, 1997-09-04 Attempts to theorize contemporary globalization rarely stray beyond variations on old themes of superordination versus subordination Yet there are many new definers of our present global reality depletion of strategic resources degradation of our environment counter offensives against modern patterns of thought and action which suggest that a new framework of global relations is needed Nelson Keith challenges the presumptions upon which Western notions of the world have rested and sounds a call to forge a world order more sensitive to all of its representative voices
