Rives coloniales Jacques Soullou, 1993 **Prison Architecture and Punishment in Colonial Senegal** Dior

Konaté, 2018-10-15 For the past four decades a rich scholarship has investigated the emergence of the prison in Europe and North America mainly the connection between institutional architecture techniques of social control and mechanisms of discipline Prison Architecture and Punishment in Colonial Senegal asks if these connections did exist in colonial Senegal since prisons in Africa had never been the focus of such scholarship This book addresses three main themes First it analyzes prison buildings and their changing architectural forms throughout the colonial period to highlight how the French used prison architecture to control Africans Second it describes the connections between the internal layout of prison spaces and punishment to show how the design of prisons expressed the notions of punishment and reforms The book also undertakes a critical assessment of inmates agency in reshaping the world of prisons in colonial Senegal Finally it discusses the legacy of colonial prisons in independent Senegal By providing a comprehensive history of prison architecture in Senegal the book helps insert Africa into a more global history by offering a uniquely comparative study of colonialism architecture and punishment

Architecture and Urbanism in the French Atlantic Empire Gauvin Alexander Bailey, 2018-06-06 Spanning from the West African coast to the Canadian prairies and south to Louisiana the Caribbean and Guiana France's Atlantic empire was one of the largest political entities in the Western Hemisphere Yet despite France's status as a nation at the forefront of architecture and the structures and designs from this period that still remain its colonial building program has never been considered on a hemispheric scale Drawing from hundreds of plans drawings photographic field surveys and extensive archival sources Architecture and Urbanism in the French Atlantic Empire focuses on the French state's and the Catholic Church's ideals and motivations for their urban and architectural projects in the Americas In vibrant detail Gauvin Alexander Bailey recreates a world that has been largely destroyed by wars natural disasters and fires from Cap François now Cap-Haïtien which once boasted palaces in the styles of Louis XV and formal gardens patterned after Versailles to failed utopian cities like Kourou in Guiana Vividly illustrated with examples of grand buildings churches and gardens as well as simple houses and cottages this volume also brings to life the architects who built these structures not only French military engineers and white civilian builders but also the free people of colour and slaves who contributed so much to the tropical colonies Taking readers on a historical tour through the striking landmarks of the French colonial landscape Architecture and Urbanism in the French Atlantic Empire presents a sweeping panorama of an entire hemisphere of architecture and its legacy

Colonial Architecture and Urbanism in Africa Fassil Demissie, 2016-12-05 Colonial architecture and urbanism carved its way through space ordering and classifying the built

environment while projecting the authority of European powers across Africa in the name of science and progress The built urban fabric left by colonial powers attests to its lingering impacts in shaping the present and the future trajectory of postcolonial cities in Africa Colonial Architecture and Urbanism explores the intersection between architecture and urbanism as discursive cultural projects in Africa Like other colonial institutions such as the courts police prisons and schools that were crucial in establishing and maintaining political domination colonial architecture and urbanism played a pivotal role in shaping the spatial and social structures of African cities during the 19th and 20th centuries Indeed it is the cultural destination of colonial architecture and urbanism and the connection between them and colonialism that the volume seeks to critically address The contributions drawn from different interdisciplinary fields map the historical processes of colonial architecture and urbanism and bring into sharp focus the dynamic conditions in which colonial states officials architects planners medical doctors and missionaries mutually constructed a hierarchical and exclusionary built environment that served the wider colonial project in Africa

"Portuguese" Style and Luso-African Identity Peter A. Mark, 2002-12-05 In this detailed history of domestic architecture in West Africa Peter Mark shows how building styles are closely associated with social status and ethnic identity Mark documents the ways in which local architecture was transformed by long distance trade and complex social and cultural interactions between local Africans African traders from the interior and the Portuguese explorers and traders who settled in the Senegambia region What came to be known as Portuguese style symbolized the wealth and power of Luso Africans who identified themselves as Portuguese so they could be distinguished from their African neighbors They were traders spoke Creole and practiced Christianity But what did this mean Drawing from travelers accounts maps engravings paintings and photographs Mark argues that both the style of Portuguese houses and the identity of those who lived in them were extremely fluid Portuguese Style and Luso African Identity sheds light on the dynamic relationship between identity formation social change and material culture in West Africa
