Greene,2007 Based on extensive research in government archives and private papers this book analyzes the secret debate within the Eisenhower administration over the pursuit of a nuclear test ban agreement In contrast to much recent scholarship this study concludes that Eisenhower strongly desired to reach an accord with the Soviet Union and the United Kingdom to cease nuclear weapons testing For Eisenhower a test ban would ease Cold War tensions slow the nuclear arms race and build confidence toward disarmament however he faced continual resistance from his early scientific advisers most notably Lewis L Strauss and Edward Teller Extensive research into previously unavailable government archival sources and collections of private manuscripts reveals the manipulative acts of test ban opponents and other factors that inhibited Eisenhower s actions throughout his presidency Meticulously analyzed these sources underscore Eisenhower s dependence on the counsel of his science advisors such as Strauss James R Killian and George B Kistiakowsky to determine the course he pursued in regard to several components of his national security strategy In addition to its comprehensive analysis of the test ban debate this book makes important contributions to the scholarly literature assessing Eisenhower s leadership and his approach to arms control **A History of Science Policy in the United States, 1940-1985** ,1986 **Oversight of the Office of Science and Technology Policy** United States.
