Science Teacher Education Sandra K. Abell, 2000-07-31 Analysis of past developments in teacher education in Pakistan has shown that substantial progress has been made in this field It has however been pointed out that education of science teachers still needs much improvement At the present there is an emergent need to meet the shortage of qualified science teachers and at the same time to bring qualitative improvements in the courses offered in teacher education institutions First we recommend that the 1 year duration of teacher preparation is grossly inadequate for all teaching courses and should be lengthened and the qualifications for entrance be increased We believe that teaching must be made a graduate profession For example the basic qualification of primary school teachers for admission to teacher education institution should be increased We recommend that PTC should be made a 12 2 year program Similarly CT 12 3 B Ed 14 2 B S Ed 12 4 M A Ed 14 3 and M Ed one year after B Ed or B S Ed Secondly we think the quality of instruction in teacher preparation programs should be improved Most teachers in the teacher preparation institutions use the lecture method most of the time Prospective teachers behave like passive listeners to their teachers They do not participate in the teaching learning process Some instructors even dictate their notes to the preservice teachers When the teachers join schools they behave the same way

Enhancing Professional Knowledge of Pre-Service Science Teacher Education by Self-Study Research Gayle A. Buck, Valarie L. Akerson, 2016-06-22 Self study research is making an impact on the field of

science education University researchers employ these methods to improve their instruction develop as instructors and ultimately impact their students learning This volume provides an introduction to self study research in science education followed by manuscripts of self studies undertaken by university faculty and those becoming university faculty members in science teacher education Chapter authors range from those new to the field to established researchers highlighting the value of self study research in science teacher education for every career rank The fifteen self studies provided in this book support and extend this contemporary work in science teacher education They and the subsequent reflections on professional knowledge are organized into four sections content courses for preservice teachers elementary methods courses secondary methods courses and preparation of future teacher educators Respondents from various locations around the globe share their reflections on these sections A culminating reflection of the findings of these studies is provided at the end of the book that provides an overview of what we have learned from these chapters as well as a reflection on the role of self study research in the future of science teacher education

Teaching Science in Diverse Classrooms Douglas B. Larkin, 2019-08-29 As a distinctive voice in science education writing Douglas Larkin provides a fresh perspective for science teachers who work to make real science accessible to all K 12 students Through compelling anecdotes and vignettes this book draws deeply on research to present a vision of successful and inspiring science teaching that builds upon the prior knowledge experiences and interests of students With empathy for the challenges faced by contemporary science teachers Teaching Science in Diverse Classrooms encourages teachers to embrace the intellectual task of engaging their students in learning science and offers an abundance of examples of what high quality science teaching for all students looks like Divided into three sections this book is a connected set of chapters around the central idea that the decisions made by good science teachers help light the way for their students along both familiar and unfamiliar pathways to understanding The book addresses topics and issues that occur in the daily lives and career arcs of science teachers such as Aiming for culturally relevant science teaching Eliciting and working with students ideas Introducing discussion and debate Reshaping school science with scientific practices Viewing science teachers as science learners Grounded in the Next Generation Science Standards NGSS this is a perfect supplementary resource for both preservice and inservice teachers and teacher educators that addresses the intellectual challenges of teaching science in contemporary classrooms and models how to enact effective reform

Self-Studies of Science Teacher Education Practices Shawn M. Bullock, Tom Russell, 2012-03-21 Part of a vital Springer series on self study practices in teaching and teacher education this collection offers a range of contributions to the topic that embody the reflections of science teacher educators who have applied self study methodology to their own professional development The material recognizes the paradox that lies between classroom science and the education of science teachers the disciplines of science are often perceived as a quest for right answers an unintentional by product of the classroom focus on right answers in student assessment in science In contrast the profession of teaching has few right

answers and frequently involves the management of conflicting tensions A dilemma thus arises in science teacher education of how to shift perspectives among student teachers from reductionist to more inclusive attitudes that are open to the mercurial realities of teaching The self studies presented here are unique fresh and stimulating They include the input of a beginning science teacher as well as science teacher educators from a range of backgrounds and varying levels of experience In addition the volume presents a truly international perspective on the issues with authors hailing from five countries Providing analysis at the leading edge of education theory this collection will make fascinating reading for those teaching science as well as those teaching science teachers
