Japan's Quest Warren S. Hunsberger, 1996-12-23 An international team of ten specialists in Japanese and American foreign relations address the crucial question what role should Japan play in international affairs This question has not found a fully satisfactory answer since the forced opening to foreign contacts in the mid nineteenth century Having copied foreign models and achieved a series of stunning successes and some failures in many aspects of private and public life Japan today stands at a pinnacle of economic power and affluence Despite this both economics and politics are undergoing major strains and changes during the 1990s and the quest for true internationalization is fraught with problems and only partially fulfilled This book is a joint project of the American University in Washington and Ritsumeikan University in Kyoto **Modernities** Peter James Taylor, 1999-01-01 A thoroughly readable far reaching analysis of modernity and the modern this book focuses on the specific periods and places where ideas and practices of being modern are created and challenged Peter J Taylor contends that modernity is a multiple phenomenon that is different modern times and different modern spaces exist in a world of multiple modernities He argues that three prime modernities have been defined by the development of the modern world from mercantile modernity to British led industrial modernity to today s American led consumer modernity and illustrates the cultural expression of these modernities as acts of the ordinary such as paintings the home and the suburbs In a masterly analysis of politics and the state in terms of the modern Taylor shows how each political organization of a particular modernity creates an appropriate political reaction for instance the socialism prompted by British modernity and the environmentalism called forth by American modernity In noting the tendency of states to create spaces and eschew places he draws an intriguing parallel between nation states and home households Taylor describes the project of Americanization as a new form of modernity and also suggests an end to American hegemony **Low Countries Yearbook 1994/95** Geert Van Istendael, Stichting Ons Erfdeel Vzw, Stichting ons erfdeel (Belgium / Rekkem), 1994-12-01 *Suriname* Irene Rolfes, 2025-01-20 *Illuminating the Renaissance* Thomas Kren, Scot McKendrick, 2003-07-01 This comprehensive and richly illustrated catalogue focuses on the finest illustrated manuscripts produced in Europe during the great epoch in Flemish illumination During this aesthetically fertile period beginning in 1467 with the reign of the Burgundian duke Charles the Bold and ending in 1561 with the death of the artist Simon Bening the art of book painting was raised to a new level of sophistication Sharing inspiration with the celebrated panel painters of the time illuminators achieved astonishing innovations in the handling of color light texture and space creating a naturalistic style that would dominate tastes throughout Europe for nearly a century Centering on the notable artists of the period Simon Marmion the Vienna Master of Mary of Burgundy Gerard David Gerard Horenbout Bening and others the catalogue examines both devotional and secular manuscript illumination within a broad context the place of illuminators within the visual arts including artistic exchange between book painters and panel painters the role of court patronage and the emergence of personal libraries and the

Immigrants and the Industries of London, 1500-1700 Lien Bich Luu,2017-03-02 Immigration is not only a modern day debate Major change in Europe in the sixteenth and seventeenth centuries led to a surge of political and religious refugees moving across the continent Estimates suggest that from 1550 to 1585 around 50 000 Dutch and Walloons from the southern Netherlands settled in England and in the late seventeenth century 50 000 Huguenots from France followed suit The majority gravitated towards London which already a magnet for merchants and artisans across the centuries began a process of major transformation New skills capital technical know how and social networks came with these migrants and helped to spark London's cosmopolitan flair and diversity But the early experience of many of these immigrants in London was one of hostility serving to slow down the adoption and expansion of new crafts and technologies Immigrants and the Industries of London 1500 1700 examines the origins and the changing face and shape of many trades crafts and skills in the capital in

this transformative period It focuses on three crafts in particular silk weaving beer brewing and the silver trade crafts which had relied heavily on foreign skills in the 16th century and had become major industries in the capital by the 18th century Each craft was established by a different group of immigrants distinguished not only by their social backgrounds social organisation identity motives migration pattern and experience and links with their home country but also by the nature of their reception assimilation and economic contribution Change was a protracted process in the London of the day Immigrants endured inferior status discrimination and sometimes exclusion and this affected both their ability to integrate and their willingness to share trade secrets And resistance by the English population meant that the adoption of new skills often took a long time in some cases more than three centuries to complete The book places the adoption of new crafts and technologies in London within a broader European context and relates it to the phenomenal growth of the metropolis and technological developments within these specific trades It throws new perspectives on the movement of skills from Europe and the transmission of know how from the immigrant population to English artisans The book explores how through enterprise and persistence the immigrants contribution helped transform London from a peripheral and backward European city to become the workshop of the world by the nineteenth century By way of conclusion the book brings the current immigration debate full circle to examine the lessons we can draw from this early modern experience

Flemish and Dutch Artists in Early Modern England Mary Bryan H. Curd, 2017-07-05 By examining their production practices in a variety of genres including manuscript illustration glass

painting and staining tapestry manufacture portrait painting and engraving this book explores how Netherlandish artists migrating to England in the early modern period overcame difficulties raised by their outsider status This study examines for the first time in this context the challenges of alien status to artistic production and the effectiveness of cooperation as a countermeasure The author demonstrates that collaboration was chief among the strategies that these foreigners chose to secure a position in London s changing art market Curd s exploration of these collaborations primarily follows Pierre Bourdieu s model of establishment and challenger in which dominance in a field of cultural production depends upon how much cultural political and economic capital can be accumulated and the effectiveness of the strategies used to confront competition The analysis presented here challenges received opinion that a collaborative work is only a joint effort of artists working together on a single monument by demonstrating that the participation of patrons and middlemen can also shape the final appearance of a work of art Furthermore this book shows that the strategic use of collaboration served the goal of competition by helping to establish foreign artists in the London art market and suggests that their coping strategies have implications for the study of immigrant behaviors today

Welfare Model Roger Goodman,Huck-Ju Kwon,Gordon White,2006-12-05 For many politicians and observers in the West East Asia has provided a broad range of positive images of the state s intervention in society Neoliberals grew excited by popular welfare systems that cost little in expenditure and bureaucracy Social democrats thought they had found a model for social cohesion and equality In fact the reality in East Asia is rather different from these stereotypes In this book six specialists of six different societies in East Asia Japan South Korea Taiwan China Singapore and Hong Kong examine the role of the state in their welfare systems There are detailed case studies on pensions health insurance housing and personal social services They provide an up to date detailed account of how these systems have developed as well as an examination of the question of whether these welfare regimes are the natural outgrowth of cultural traditions or the result of economic and political conditions This broad ranging and detailed study will be welcomed by both students and policy makers as the first proper academic study in English to have such a wide coverage of this topic Its clarity and authority should come as a welcome alternative to the more common misconceptions about Asian society The Twilight of the Nation State Prem Shankar Jha,2006-08-20 This book offers an in depth historical perspective on the rise of capitalism written by one of the leading scholars of the Global South Arguing that globalisation is poorly understood it offers a new synthesis of political and economic theory that sheds light on the consequences of rapid industrialisation world wide Writing from outside the usual Western perspective the book challenges many of the usual preconceptions about the impact of globalisation
