Fender's sleek adaptable guitars fuelled the pop music boom of the 60s and since that time they have been heard in the hands of virtually every guitarist of note from Buddy Holly to Kurt Cobain, from Eric Clapton to John Mayer. This book is a beautiful detailed examination of six decades of great guitars and the fine music they continue to inspire.

Difference Spaces and Invariant Linear Forms Rodney Nillsen, 2006-11-15 Difference spaces arise by taking sums of finite or fractional differences. Linear forms which vanish identically on such a space are invariant in a corresponding sense. The difference spaces of $L_2(\mathbb{R}^n)$ are Hilbert spaces whose functions are characterized by the behaviour of their Fourier transforms near e.g. the origin. One aim is to establish connections between these spaces and differential operators, singular integral operators and wavelets. Another aim is to discuss aspects of these ideas which emphasise invariant linear forms on locally compact groups. The work primarily presents new results but does so from a clear, accessible and unified viewpoint which emphasises connections with related work.
