Lucid Waking

Lucid Waking:

Lucid Waking Georg Feuerstein, 1997-08-01 A noted scholar of Eastern philosophy explains how to make the experience of heightened awareness a part of everyday life and how this can transform the planet. Lucid waking means bringing an intense awareness to the business of living by meeting the challenges of existence sanely, creatively and philosophically. It is the goal of all the great spiritual traditions of the world. Georg Feuerstein shows how this awareness is quietly emerging in individuals in the West after a prolonged spiritual slumber. Lucid Waking shows us that it is possible to be so vividly engaged in life that it will seem as though others are sleepwalking by comparison. Feuerstein brings clarity to the often murky concepts of soul, spirit, imagination, wholeness and enlightenment, providing a sensible accounting of higher consciousness and self-transcendence in modern life as we approach the millennium. Rich with philosophy and insight from one of our most gifted chroniclers of the inner experience, Lucid Waking is a statement of unshakable faith in the great potential of humanity.

Lucid Waking: The Answer to the Problem of Consciousness Jack Tanner, 2021-07-27 There is no problem more baffling to the academic world than the problem of consciousness. It's fair to say that no academic has any clue at all about what consciousness is. In fact, academics have totally confused it with something radically different, namely, sentience. The problem that faces the academic world is the insurmountable one of how you get lifeless, mindless, purposeless objects, material atoms to manifest subjectivity. It's a category error to imagine that matter can provide any answers to the foundational issues of mind. Academics believe that to answer the problem of subjectivity is thereby to solve the hard problem of consciousness. In fact, the problem of subjectivity/sentience is totally different from the problem of consciousness. To understand why, simply ponder all of the following statements: 1. animals are sentient but not conscious; 2. human babies are sentient but not conscious; 3. humans who never encountered another human are sentient but not conscious; 4. sleepwalking humans are sentient but not conscious. The problem of sentience is drastically different from the problem of consciousness, and if you conflate the two, you have immediately set yourself an impossible task, especially if you make any attempt to solve these problems within the framework of materialism, i.e. the ideology of anti-mind. To understand what consciousness actually is, it's essential to understand the difference in the world of sleep between dreaming and lucid dreaming. Exactly the same dichotomy is present in the waking world. A sleepwalker is a person who can do complex tasks such as riding a motorbike for half an hour without any consciousness. A conscious version of a sleepwalker engages in what we refer to as lucid waking. Lucid waking is the key to consciousness. The fact is that consciousness is not an inherent property of human individuals. It's not built into them. It's acquired, just as some people acquire the ability to become lucid dreamers. Since sleepwalkers could do many of the same things as conscious individuals, the question is invited: why is consciousness required at all? If you don't know what consciousness is, how can you expand your consciousness to the maximum? Wouldn't you like to be maximally conscious? Think of the power you would have. **Lucid Dreaming, Waking Life** Elliot Riley, 2020-06-12 Lucid dreaming the

Rosen, 2024-02-27 The Dreaming Mind provides an insightful interdisciplinary approach to the study of dreaming exploring its nature and examining some of the implications of dream states for theories of consciousness cognition and the self Drawing on research from philosophy cognitive science and psychology the book reveals new insights into the sleeping and waking mind It considers philosophical thinking such as extended mind theory theories of consciousness and theories of the self applying these to empirical dream research The book embraces a pluralistic account of dreaming showing how dream experiences can be highly varied in content and cognition and discusses the implications of dreaming for a variety of influential consciousness theories including higher order thought theory global workspace theory and the phenomenal access distinction Alongside imaginative and hallucinatory dreaming the book also discusses vicarious dreaming and its implications for philosophy of the self Offering an integrative approach into our understanding of dreams and the mind this book is essential reading for students and researchers of consciousness dreams philosophy and cognitive sciences as well as anyone who is curious about dreaming *Creative Dreaming* Patricia Garfield, 1995-07 With more than 250 000 copies sold this classic exploration of dreams and how to use them has been updated to reflect recent research on dreams and dreaming Dreams Beyond Time Lee Irwin, 2022-05-04 Dreams Beyond Time On Sacred Encounter and Spiritual Transformation offers readers an overview of dreams research as applied to non ordinary dreams Lee Irwin describes four basic types of dreaming normative mythic psychic and transpersonal and he

illustrates each type with specific dream examples These types of dreaming are then used as a lens to look more closely at additional dream types that indicate dreaming as a process of creative discovery Through virtual dreaming encounters latent human potentials are revealed and suggest aspects for spiritual development based on dream recording interpretation and analysis In turn this leads to a metaphysical description that is pan sentient illustrating a vivid living universe of process becoming in which certain dream types reveal mythic psychic and transpersonal capacities as intrinsic to a deeper more awakened sense of intersubjective self awareness While dream theories from many diverse authors are explored the author uses an existential and phenomenological method to analyze dreaming contents in relationship to altered states of mind trance out of body and near death experience meditation imagination and stages of lucid self awareness Transpersonal dreams are given considerable attention in relationship to mystical traditions paranormal research and the comparative anthropology of self

research he concludes that while dreaming everyone everywhere experiences dreams as embodied events in time and space while the dreamer is convinced of being awake it is after waking into our specific cultural stories about dreaming that the widely differing attitudes towards dreams arise By taking dreaming reality not our waking interpretation of it as the model for imagination this book creates a paradigm shock and produces methods which can be applied in a wide variety of cultural settings Through detailed case studies professionals and students will find thorough discussions of ways to flashback into dreams and memories while in a hypnagogic state of consciousness the practice of embodied imagination and its profound physical effects psyche as a self organizing multiplicity of selves the nature of subjectivity the body as a theatre of sense memories the limitation of reason the process of dissociation the treatment of trauma This book discusses a variety of techniques which may be applied by health professionals to their patients and clients It will also be of particular interest to Jungian and relational psychoanalysts psychotherapists and clinical psychologists as well as to artists actors directors writers and other individuals who wish to explore the creative imagination [Dreaming in Auschwitz](#) Wojciech

Owczarski,2022-11-22 This book based on the descriptions of their dreams that former Auschwitz inmates wrote in 1973 provides a deep insightful explanation of the role of dreams in shaping the prisoners experiences It studies these testimonies from a broad interdisciplinary perspective analysing the psychological social anthropological narrative and even artistic dimensions of the reports The book characterises the content of the dreams and their possible meanings the manners in which the respondents sensed understood and described their dreams and the informants attitudes towards dreaming Among thousands of books about the Nazi atrocities this one is unique because it explores the Holocaust through the prism of dreams The dream descriptions serve here as an exceptional source of knowledge They often reveal not only an image of the camp reality but also the truth that remained unconscious incomprehensible and unspeakable for the dreamers themselves As such this text will serve to open a completely new way of thinking and writing about the Holocaust **The Dream**
