Manly And Muscular Diversions:

Manly & Muscular Diversions Tony Money,1997 Modern sports and games are widely regarded as Britain's gift to the world. In the late 19th century British expatriate businessmen, railway builders and construction workers spread football through continental Europe and the Americas and British Army garrisons introduced cricket and football wherever the map was pink. In this book Tony Money shows how the roots of this export of team games lie both in the stable political and economic circumstances that prevailed in Britain in the 18th and early 19th centuries and more particularly in the enthusiasms of boys at English public boarding schools.

Muscle and Manliness Axel Bundgaard,2005-07-11 Axel Bundgaard has produced a meaningful work on the important but little told history of interschool athletics exploring the introduction and nature of sport in the controlled environment of the American boarding school. Beginning in the late eighteenth century American educators looked to the English public school as the educational archetype for producing good men, good Christians and good leaders. The British incorporation of sport into the process of education, however, took root only slowly in the United States where it seemed alien to Puritan values extolling hard work and deploring play as wasted time. Only when educators were convinced that sport was an essential tool in the process of raising the next generation by building character, team spirit and leadership did the informal physical play initiated by students in early schools begin to evolve toward the highly organized school sponsored sports of today. Using archival material from several eastern boarding schools founded in the eighteenth and nineteenth centuries, Bundgaard traces this process from its beginnings in the muscular Christianity prevailing in the boarding schools of Victorian England, most notably Rugby. There athletics and the prefect system, older boys shaping the manners and morals of younger ones, were used to mold youth into Christian gentlemen and it was believed that the seeds of future military victories were planted on the school playing fields. Bundgaard shows how this model of sport and character building was gradually absorbed into the classical curricula of private education in America and then continues to chronicle the dramatic changes in this model through the first decade of the twentieth century as educational philosophies evolved and an ideal of physical vigor and conduct befitting a gentleman emerged. Drawing on archival sources at Groton, Andover, Exeter, St Paul's, Suffield, Williston, Woodberry Forest and Worcester Academy, interviews, personal communications, school newspapers and histories of various institutions, Bundgaard provides a new critical perspective on the evolution of play and sports for schoolboys. This book will stimulate research on the broader subject of American secondary school athletics and pique the interest of sport historians, educators and a general audience.

Teachers and Football Colm Kerrigan,2005 Teachers and Football explores the origins of schoolboy football in England and the factors influencing its development. It assesses the impact that schoolboy football has had on the development of the national game and on the development of sport in the community at large.

nineteenth century The book tests Dunning's status rivalry hypothesis to contest Harvey's view of football's development which stresses an influential sub culture outside the public schools Status Rivalry re states the primacy of these latter institutions in the growth of football and without it the sport's story would remain skewed and unbalanced for future generations

Sport and Democracy in the Ancient and Modern Worlds Paul Christesen, 2012-10-15 This book explores the relationship between sport and democratization Drawing on sociological and historical methodologies it provides a framework for understanding how sport affects the level of egalitarianism in the society in which it is played The author distinguishes between horizontal sport which embodies and fosters egalitarian relations and vertical sport which embodies and fosters hierarchical relations Christesen also differentiates between societies in which sport is played and watched on a mass scale and those in which it is an ancillary activity Using ancient Greece and nineteenth century Britain as case studies Christesen analyzes how these variables interact and finds that horizontal mass sport has the capacity to both promote and inhibit democratization at a societal level He concludes that horizontal mass sport tends to reinforce and extend democratization

Catholics of Consequence Ciaran O'Neill, 2014-06-13 For as far back as school registers can take us the most prestigious education available to any Irish child was to be found outside Ireland Catholics of Consequence traces for the first time the transnational education careers and lives of more than two thousand Irish boys and girls who attended Catholic schools in England France Belgium and elsewhere in the second half of the nineteenth century There was a long tradition of Irish Anglicans Protestants and Catholics sending their children abroad for the majority of their formative years However as the cultural nationalism of the Irish revival took root at the end of the

nineteenth century Irish Catholics who sent their children to school in Britain were accused of a pro Britishness that crystallized into still recognisable terms of insult such as West Briton Castle Catholic Squireen and Seoinin This concept has an enduring resonance in Ireland but very few publications have ever interrogated it Catholics of Consequence endeavours to analyse the education and subsequent lives of the Irish children that received this type of transnational education It also tells the story of elite education in Ireland where schools such as Clongowes Wood College and Castleknock College were rooted in the continental Catholic tradition but also looked to public schools in England as exemplars Taken together the book tells the story of an Irish Catholic elite at once integrated and segregated within what was then the most powerful state in the world
