**Questions and Information Systems** Thomas W. Lauer,Eileen Peacock,Arthur C. Graesser,2013-04-15 The design and functioning of an information system improve to the extent that the system can handle the questions people ask Surprisingly however researchers in the cognitive computer and information sciences have not thoroughly examined the multitude of relationships between information systems and questions both question asking and answering The purpose of this book is to explicitly examine these relationships Chapter contributors believe that questions play a central role in the analysis design and use of different kinds of natural or artificial information systems such as human cognition social interaction communication networks and intelligent tutoring systems Their efforts show that data structures and representations need to be organized around the questioning mechanisms in order to achieve a quick retrieval of relevant useful information **The**

**Exclusionary Rule of Evidence** Asst Prof Kuo-hsing Hsieh,2014-11-28 This book argues the need for the establishment of an exclusionary rule of evidence in China as a means of protecting the people from police wrongdoing In support of the argument and as a means of developing a suitable process the author takes a comparative approach to the foundation and development of the exclusionary rule in the UK and the USA whilst also exploring the issues that may arise in transferring the rule from one legal system to another *SMP 7-13:Extra Assessment Tests* School Mathematics Project,1979-05-03
