More Than Meets the Eye Thomas L. Larry, 2023-06-12 Misunderstandings of biblical creation texts have resulted from a lack of appreciation of the cultural context of the inspired writers Views of nature have changed greatly over history At the time of ancient Israel people gazed up to the star studded firmament that separated the waters above from the waters below and the land Land was bounded by sea which merged with the waters above at the horizon The universe was close and intimate Pagan peoples believed gods occupied this realm and accounted for much of observed cause and effect Biblical writers also viewed nature in this context However they were distinctly monotheistic writing of a supreme God who made and gave meaning to everything God chose a covenant relationship with a select people This relationship was based on belief in God faith Fast forward through many twists and turns of intellectual history and we come to the modern scientific age We picture our home as a spherical planet rotating once a day and orbiting the sun yearly We gaze out at a vast space seeing distant suns the stars and enormous collections of stars galaxies Light travels at a known speed thus astronomers peer back to times billions of years in the past We need to avoid concordism conflating modern views with the biblical text The concordism error has occurred throughout church history up to the present The book addresses this as well as some discoveries of modern science that were unknown to ancient people Such discoveries give us good reason to bow in awe before the Creator Even though mankind's views of nature have greatly changed with time the message of the Bible is the same We come to God through faith as did Abraham who saw more than meets the eye

More Than Meets the Eye A. Nigel Goring-Morris, Anna Belfer-Cohen, 2003 These twenty three papers focus on recent research into the Upper Palaeolithic of the Levant a murky period of human history ca 45 000 to 20 000 years ago during which modern patterns of human behaviour and communication became the norm The vast majority of archaeological data from this period relates to chipped stone tools and most contributors focus on defining and distinguishing the two main traditions in lithic technology the Levantine Aurignacian and the Ahmarian Some papers report on recent fieldwork others seek to define and explain reasons for variation and change in material culture Do lithic traditions represent different corporate groups of hunter gatherers or can variation be explained by other factors such as adaptations to local landscapes and environments or changing patterns of mobility An appendix provides a comprehensive list of available Upper Palaeolithic 14C dates in the Near East Most of the papers derive from a conference session on the Levantine Upper Palaeolithic held as part of the Society for American Archaeology annual meeting in 2000

Hollywood or History? Scott L. Roberts, Charles J. Elfer, 2024-10-01 In response to the limitations associated with teaching through film we sought to develop practical lesson ideas that might bridge gaps between theory and practice and assist teachers endeavoring to make effective use of film in their classrooms One of the more interesting sources of visual media many authors in the previous volumes elected to use as the focus of their lesson plans were cartoons These lesson plans have been some of the more popular in the series and are often easier to adapt for a

variety of grade levels In conducting research for this volume we learned that cartoons are an often used media sources in the classroom They have similar strengths and weaknesses in not only the teaching of history but other social studies disciplines as well While in many cases their intended audience is younger children people of all ages enjoy cartoons This makes them useful for teaching students at all grade levels as well as adults as there will be immediate buy in if used as a source of analysis for inquiry based lessons As with live action film we believe cartoons can also serve as a powerful tool in the social studies classroom and if appropriately utilized can foster critical thinking and civic mindedness The College Career and Civic Life C3 framework adopted by the National Council for the Social Studies in 2013 represents a renewed and formalized emphasis on the perennial social studies goals of deep thinking reading and writing The C3 is comprehensive and ambitious Moreover we believe that as teachers endeavor to digest and implement the platform in schools and classrooms across the country the desire for access to structured strategies that lead to more active and rigorous investigation in the social studies classroom will grow increasingly acute Our hope is that the present volume might play a small role in the larger Hollywood or History project of supporting practitioners specifically teachers of preK 12 social studies disciplines by offering a collection of 19 classroom ready lesson designed to foster social studies inquiry through the careful use of selected cartoons

A History of American Literature Percy H. Boynton, 2014 A History of American Literature In its beginnings American literature differs from the literatures of most other great nations it was a transplanted thing It sprang in a way like Minerva full armed from the head of Jove Jove in this case being England and the armor being the heritage which the average American colonist had secured in England before he crossed the Atlantic In contrast Greek Roman French German English and the other less familiar literatures can all be more or less successfully traced back to primitive conditions Their early life was interwoven with the growth of the language and the progress of a rude civilization and their earliest products which have come down to us were not results of authorship as we know it to day They were either folk poetry composed perhaps and certainly enjoyed by the people in groups and accompanied by group singing and dancing like the psalms and the simpler ballads or they were the record of folk tradition slowly and variously developed through generations and finally collected into a continuous story like the Iliad the neid the Song of Roland the Nibelungenlied and Beowulf They were composed by word of mouth and not reduced to writing for years or generations and they were not put into print until centuries after they were current in speech or transcribed by monks and scholars

Enchanted Lives, Enchanted Objects Dianne Sachko Macleod, 2008 This insightful and beautifully illustrated book offers the first feminist analysis of the phenomenon of women art collectors in America Dianne Sachko Macleod brings a surprising paradox to light showing that collecting which provided wealthy women with a private sense of solace also liberated them to venture into the public sphere and make a lasting contribution to the emerging American culture Beginning in the antebellum period continuing through the Gilded Age and reaching well into the twentieth century Macleod shows how elite women enlisted the objets d art and avant garde paintings

in their collections in causes ranging from the founding of modern museums to the campaign for women's suffrage

Brown, 2020-01-16 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both more salient

and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies

Space and Narrative in the Nineteenth-Century British Historical Novel Tom Bragg, 2016-03-31 Demonstrating that nineteenth century historical novelists played their rational trustworthy narrators against shifting and untrustworthy depictions of space and place Tom Bragg argues that the result was a flexible form of fiction that could be modified to reflect both the different historical visions of the authors and the changing aesthetic tastes of the reader Bragg focuses on Scott William Harrison Ainsworth and Edward Bulwer Lytton identifying links between spatial representation and the historical novel s multi generic rendering of history and narrative Even though their understanding of history and historical process could not be more different all writers employed space and place to mirror narrative stimulate discussion interrogate historical inquiry or otherwise comment beyond the rational factual narrator s point of view Bragg also traces how landscape depictions in all three authors works inculcated heroic masculine values to show how a dominating theme of the genre endures even through widely differing versions of the form In taking historical novels beyond the localized questions of political and regional context Bragg reveals the genre s relevance to general discussions about the novel and its development Nineteenth century readers of the novel understood historical fiction to be epic and serious moral and healthful patriotic but also universal Space and Narrative in the Nineteenth Century British Historical Novel takes this readership at its word and acknowledges the complexity and diversity of the form by examining one of its few continuous features a flexibly metaphorical valuation of space and place
