More Than Human:

More-Than-Human Literacies in Early Childhood Abigail Hackett, 2021-03-25 *More Than Human Literacies in Early Childhood* draws on a long term ethnographic research into the role of place materiality and the body in the literacies of young children aged 12-36 months. It builds a picture of how children participate in or become caught up in literacies and language in the contexts of their everyday lives. Throughout the book, recognised understandings of young children are decentred in favour of experiential knowing of parents and communities, body, place, knowing and ordinary affects. Abigail Hackett argues that young children's literacies are always more than human, involving sounds, gestures and movements between humans and nonhuman places and things. By paying close attention to the more than human nature of these literacies, which rely on bodies, places, animals, humans, objects and atmospheres for their ongoingness, a case is made for the decentring of young children. The book will be of particular interest to researchers looking at feminist new materialism, posthumanism, affect theory and critical literacy in early childhood settings. *Becoming Creole* Melissa A. Johnson, 2019 Taking the reader into the lived experience of Afro Caribbean people who call the watery lowlands of Belize home, Melissa A. Johnson traces Belizean Creole peoples' relationships with the plants, animals, water and soils around them and analyzes how these relationships intersect with transnational racial assemblages. **Ecofeminism on the Edge** Goran Đurđević, Suzana Marjanić, 2024-02-02 With a special focus on education and underrepresented geographical locations, this book is an inclusive collection of theories, discourses, art, identities and practices related to this discipline. Critical Approaches to Climate Change and Civic Action Anabela Carvalho, Julie Doyle, Chris Russill, 2021-09-10 **The Ethics and Rhetoric of Invasion Ecology** James Stanescu, Kevin Cummings, 2016-10-26 *The Ethics and Rhetoric of Invasion Ecology* provides an introduction to the controversial treatment and ongoing violence routinely utilized against non-native species. Drawing from the tradition of critical animal scholars, Stanescu and Cummings have assembled a group of advocates who argue for a different kind of relationship with foreign species. Where contemporary approaches often emphasize the need to eradicate ecological invaders in order to preserve delicate habitats, the essays in this volume aim to reformulate the debate by arguing for an alternative approach that advances the possibility of an ethics of co-habitation. Methodological Approaches to STEM Education Research Volume 3 Peta J. White, Russell Tytler, Joseph Paul Ferguson, John Cripps Clark, 2022-09-30 We live in challenging and uncertain times with profound implications for the purpose and nature of education. The crises of the Anthropocene, with the related climate-related challenges, biodiversity loss, a global pandemic and changes to the world of work driven by science and technology innovation and the ascendancy of data and knowledge, pressure us to rethink how we prepare people for such futures. This in turn has changed the landscape of educational research, perhaps particularly in the areas of mathematics, health and environmental education research that are so central to responding to these global pressures and potential solutions. We need to think critically about education research design and practice as part of a considered and robust

discussion of education research theory and practice that will inform and help shape education systems into the future This volume responds to these challenges casting fresh light on contemporary methodologies fit for reconsidering education into the future Chapters explore post qualitative inquiry with overviews and practices arts based and interdisciplinary methodologies self study and auto ethnography for the Anthropocene co design with teachers researching for system change the ethics of netnography and principles and practices of literature review *Art Education for a Sustainable Planet* Joy G. Eva Haifa Giraud,2019-10-18 By foregrounding the ways that human existence is bound together with the lives of other entities contemporary cultural theorists have sought to move beyond an anthropocentric worldview Yet as Eva Haifa Giraud contends in *What Comes after Entanglement* for all their conceptual power in implicating humans in ecologically damaging practices these theories can undermine scope for political action Drawing inspiration from activist projects between the 1980s and the present that range from anticapitalist media experiments and vegan food activism to social media campaigns against animal research Giraud explores possibilities for action while fleshing out the tensions between theory and practice Rather than an activist ethics based solely on relationality and entanglement Giraud calls for what she describes as an ethics of exclusion which would attend to the entities practices and ways of being that are foreclosed when other entangled realities are realized Such an ethics of exclusion emphasizes foreclosures in the context of human entanglement in order to foster the conditions for people to create meaningful political change America since 1945 Paul Levine,Harry Papasotiriou,2010-11-17 The period from 1945 to the present day may not constitute an American century but it can be seen as the American Moment the time when for good or ill the United States became the predominant political military economic and cultural power in the world This revised and updated new edition introduces the historic and tumultuous developments in American politics foreign policy society and culture during this period It includes coverage of key recent events such as the 2008 election of Barack Obama global recession protracted war in Iraq and Afghanistan rise of the internet transformation of American Society and Culture challenges of new immigration and multi culturalism changing global status of the US in the new millennium Examining the American Moment in a global context the authors emphasise the interaction between politics society and culture *America Since 1945* encourages an awareness of how central currents in art literature film theatre intellectual history and media have developed alongside an understanding of political economic and social change **Art, Theory and Practice in the Anthropocene** Julie Reiss,2019-09-30 *Art Theory and Practice in the Anthropocene* contributes to the growing literature on artistic responses to global climate change and its consequences Designed to include multiple
