Johnson,2016-04-22 Lawyer politician diplomat and leading architect of the League of Nations Robert Cecil 1st Viscount Cecil of Chelwood was one of Britain's most significant statesmen of the twentieth century His views on international diplomacy cover the most important aspects of British European and American foreign policy concerns of the century including the origins and consequences of the two world wars the disarmament movement the origins and early course of the Cold War and the first steps towards European integration His experience of the First World War and the huge loss of life it entailed provoked Cecil to spend his life championing the ethos behind and work of the League of Nations a role for which he was awarded the Nobel Peace Prize in 1937 Yet despite his prominence in the international peace movement Cecil has never been the focus of an academic biography Cecil has perhaps been judged unfairly due to his association with the League of Nations which has since been generally regarded as a failure However recent academic research has highlighted the contribution of the League to the creation of many of the institutions and precepts that have since the Second World War become accepted parts of the international system not least the United Nations In particular Cecil and his work on arms control lay the basis for understanding this new area of international activity which would bear fruit during the Cold War and after Through an evaluation of Cecil's political career the book also assesses his reputation as an idealist and the extent to which he had a coherent philosophy of international relations This book suggests that in reality Cecil was a Realpolitiker pragmatist whose attitudes evolved during two key periods the interwar period and the Cold War It also proposes that where a coherent philosophy was in evidence it owed as much to the moral and political code of the Cecil family as to his own experiences in politics Cecil's social and familial world is therefore considered alongside his more public life *The Emergence of*

*International Society in the 1920s* Daniel Gorman,2012-08-20 Chronicling the emergence of an international society in the 1920s Daniel Gorman describes how the shock of the First World War gave rise to a broad array of overlapping initiatives in international cooperation Though national rivalries continued to plague world politics ordinary citizens and state officials found common causes in politics religion culture and sport with peers beyond their borders The League of Nations the turn to a less centralized British Empire the beginning of an international ecumenical movement international sporting events and audacious plans for the abolition of war all signaled internationalism's growth State actors played an important role in these developments and were aided by international voluntary organizations church groups and international networks of academics athletes women pacifists and humanitarian activists These international networks became the forerunners of international NGOs and global governance **A Memoir Upon the Maps of Bengal Constructed from 1764 Onward by**

Bruce Strang,2016-05-23 Italy's invasion of Ethiopia in 1935 marked a turning point in interwar Europe The last great European colonial conquest in Africa the conflict represented an enormous gamble for the Fascist dictator Benito Mussolini He faced a challenge not only from a stout Ethiopian defence but also from difficult logistics made worse by the League of Nations half hearted sanctions Mussolini faced down this opposition and Italian troops aided by air superiority and liberal use of yprite gas conquered Addis Ababa within eight months a victory that shocked many military observers of the time with its speed and suddenness The invasion had enormous repercussions on European international relations In the midst of a national election campaign the British National Government had felt constrained to support the League despite fears that sanctions through the League could lead to war with Italy The concentration of the Royal Navy in the Mediterranean Sea alienated Mussolini and placed the French government on the horns of dilemma should France support its military partner Italy or its more important potential ally Great Britain French attempts to mark out a middle ground did little to placate the Duce and the crisis seemed to develop a deep rift between Fascist Italy and the Anglo French democracies while at the same time creating a crisis in Anglo French relations Mussolini turned towards Nazi Germany in an attempt to end his diplomatic isolation during the sanctions episode although Hitler considered the Duce's friendship a mixed blessing The question of American adherence to sanctions

increased ill will between British politicians and the Roosevelt administration in Washington as each tended to blame the other for the failure of oil sanctions and the collapse of collective security. The international crisis posed similarly thorny problems for the smaller powers of Europe and for Japan and the Soviet Union. The crisis impeded common defence against Fascist expansionism while giving impetus to claims of the revisionist powers. Despite the tremendous importance of the international crisis however little new work on the subject has appeared in recent decades. In this volume an international cast of contributors take a fresh look at the crisis through the lens of new evidence and new approaches to international relations history to provide the most comprehensive coverage of the crisis currently possible and their work provides new frames of reference for exploring imperialism, collective security and genocide.
