(William Edward Daniel) Ross, 1977 **Puffs of Enlightenment** Sparky McPherson, 2024-01-09 Embark on a Poetic Journey Through a Smoky World Imagine holding in your hands a passport that doesn't just take you to new places but unlocks new states of mind Puffs of Enlightenment Poems of the Pot Passport is your ticket to a poetic voyage wrapped in the scents and smoke of the world's most enigmatic plant Each page is a trip each verse a new destination Begin your odyssey in the lush landscapes of Asia with Smoking Thai Stick in Thailand before ascending the mystical mountains of Nepal Drift through the cherry blossoms of Japan each puff enchanting you to the depths of tranquil thought This collection is not simply about cannabis it's about the experiences the cultures and the ineffable moments that it accentuates As you turn the pages you're transported to Amsterdam's notorious backstreets and immersed into the heart pumping atmosphere of Ibiza's nightclubs each site offering a different shade of euphoria The adventure only intensifies as you inhale Africa's aromatic airs and venture through the rich red soils of the outback under a blanket of southern stars Feel the rhythm of North America from Cali Kush clouds to the enigmatic northern lights of Alaska As the South American smolders embolden your spirit brace for the Caribbean's gentle beaches where the ganja breezes whisper tales of relaxation And still there's more the Middle Eastern mists await with their ancient wisdom while the Indian influence unfurls its creamy daydreams upon your conscience At the end you may find yourself passionately knowledgeable on the strains that inspired your poetic journey and the complex tapestry of legalities faced by the wandering smoker Dive into the mesmerizing Puffs of Enlightenment where each poem brings forth a new puff of insight and each inhale of literature leaves you a bit more enlightened than the last Let your imagination soar on wings of smoke discover the world verse by euphoric verse **Briquetting in Metallurgy** Aitber Bizhanov, 2022-08-18 In the arsenal of ways of carbon consumption and emissions reduction the main tasks of modern metallurgy briquetting occupies significant places Today briquetting is a cost effective industrially mastered technology capable to process natural and anthropogenic materials without their preliminary high temperature treatment The book summarizes the scientific research and the practice of briquettes use for the smelting of cast iron steel ferroalloys and the production of direct reduced iron Comparison with sintering and pelletization is given Particular attention is paid to debunking the myths about briquetting which are firmly rooted in the minds of metallurgists *The Living Age*, 1898 *Catalog of Copyright Entries. and recommendations with which policy makers in the transition countries are today being bombarded This major new reference work pulls together many years of research in order to present a bio bibliographic dictionary of Russian and Soviet economists many of whom have previously had no coherent record compiled of their careers achievements and wider significance Through exploring this rich tradition of economic thought we can go some way in understanding the role of economists in the functioning of the Soviet system as well as bringing previously forgotten work to light raising new questions and providing a memorial to those who suffered as a result of the system This hugely detailed and important new volume takes into account all the nuances of the story of Russian and Soviet economic thought such as regional issues the reform and transition to a market economy and the economic output of non economists Featuring nearly 500 entries and including a detailed contextual introduction this landmark volume will be a vitally important reference work for all those with an interest in the history of economic thought the history of economics and Russian and Soviet history more generally

Pakhomov, 2014-07-08 In this book the author presents selected challenges of thermal hydraulics modeling of two phase flows in minichannels with change of phase These encompass the common modeling of flow boiling and flow condensation using the same expression Approaches to model these two respective cases show however that experimental data show different results to those obtained by methods of calculation of heat transfer coefficient for respective cases Partially that can be devoted to the fact that there are non adiabatic effects present in both types of phase change phenomena which modify the pressure drop due to friction responsible for appropriate modelling The modification of interface shear stresses between flow boiling and flow condensation in case of annular flow structure may be considered through incorporation of the so called blowing parameter which differentiates between these two modes of heat transfer On the other hand in case of bubbly flows the generation of bubbles also modifies the friction pressure drop by the influence of heat flux Presented are also the results of a peculiar M shape distribution of heat transfer coefficient specific to flow boiling in minichannels Finally some attention is devoted to mathematical modeling of dryout phenomena A five equation model enabling determination of the dryout location is presented where the mass balance equations for liquid film droplets and gas are supplemented by momentum equations for liquid film and two phase core Canadiana ,1986 **Essays on Karolina**

sidelined or quashed by Stalin The book provides a telling example of the social construction of science showing how the perceived political implications of rival ecological theories influenced Soviet scientists and chronicles the nature protection movement's conflicts with both the vigilantes of the Cultural Revolution and Stalin's first Five Year Plan which blatantly ignored potential environmental consequences in its quest to industrialize on a large scale The new afterword reflects upon the study's impact and discusses advances in the field since the book was first published Now in paperback this classic text is well suited for course use in Russian history environmental studies and history of science **The Mists of Fear** John Creasey, 2015-09-20 Dr Palfrey is up against an enemy who moves in a white insidious mist that brings death It dissipates just as suddenly as it appears and people engulfed within it simply disappear They are the children of politicians religious clergy and other notables The world is threatened and Palfrey is completely puzzled by the terror being ranged **Death in a Darkening Mist** Iona Wishaw, 2017-04-11 The second instalment in the Lane Winslow mystery series for fans of the Maisie Dobbs and Bess Crawford series On a snowy day in December 1946 Lane Winslow a former British intelligence agent who's escaped to the rural Canadian community of King's Cove in pursuit of a tranquil life is introduced to the local hot springs While there she overhears nearby patrons speaking Russian When one of those patrons is found dead in the change room Lane's linguistic and intelligence experience is of immeasurable value to the local police force in solving the murder The investigation points to the Soviet Union where Stalin's purges are eliminating enemies and the reach of Stalin's agent snakes all the way into a harmless Doukhobor community Winslow's complicated relationship with the local police inspector Darling is intensified by the perils of the case and by the discovery of her own father's death during the war The case comes to a frantic and shocking end with a perilous nighttime journey along treacherous snow covered roads The Russian Theme in English Literature from the Sixteenth Century to 1980 Anthony Glenn Cross, 1985 **The Land of the Nihilist** William Eleroy Curtis, 1888
