*Mosquitopanik!* Martin W. Bowman, 2004-09-19 Of all the planes that flew in WW2 the Wooden Wonder the two engined Mosquito or Mossie as it was affectionately called was truly the most versatile and feared by the Germans Fast and manoeuvrable the Mossie was just as at home in the pathfinder role as she was as a fighter interceptor particularly of V1s as a night fighter low level bomber Mosquitopanik tells of the hugely successful war career of this much loved aeroplane that caught the public's and its pilots' imagination Here we have gripping tales of action in the air thanks to the most meticulous research by a true enthusiast

**Mosquito Men** David Price, 2022-10-13 In November 1940 a remarkable prototype aircraft made its maiden flight from an airstrip north of London Novel in construction and exceptionally fast the new plane was soon outpacing the Spitfire and went on to contribute to the RAF's offensive against Nazi Germany as bomber pathfinder and night fighter The men who flew it nicknamed this most flexible of aircraft the wooden wonder for its composite wooden frame and superb performance Its more familiar name was the de Havilland Mosquito and it used lightning speed and agility to inflict mayhem on the German war machine From the summer of 1943 as Bomber Command intensified its saturation bombing of German cities Mosquitos were used by the Pathfinder Force which marked targets for night time bombing to devastating effect Mosquito Men traces the contrasting careers of the young men of 627 Squadron including that of Ken Oatley last living member of an illustrious group who flew twenty two operations in Mosquitos as a navigator David Price's atmospheric narrative interweaves the human stories of the crews of 627 Squadron with events in the wider war as the Allies closed in on Germany from the summer of 1944 Mosquito Men is rich in evocative and technically authoritative accounts of individual missions flown by an aircraft that ranks alongside the Spitfire the Hurricane and the Lancaster as one of the RAF's greatest ever flying machines and perhaps the most versatile warplane ever built For those fans of the Mosquito aircraft recently described by Rowland White Mosquito Men will add the human element to this iconic plane

Spartan Mosquitoes Ernest Durwood Scullion,2022-11-07

IMAGINE flying miles above the earth in a wooden airplane with no pressurization and little heat At 30 000 feet the outside air temperature is about 35 Fahrenheit After a few hours the cabin temperature drops to 20 Now imagine taking aerial photographs of Canada's Arctic to map the land after World War II and living a life of isolation in a tent on the permafrost near the top of the world Photographer Ernest Scullion experienced these harsh conditions first hand when flying in the tail section of the Spartan Mosquito an airplane used for fighting and photo reconnaissance Spartan Mosquitoes chronicles the events surrounding his time capturing the landscape from the plane's tail section between 1956 and 1962 when the high Arctic had never been photographed Most of it had never even been seen by humans Radios and compasses did not work near the North Pole so the airplanes flew without any way to get in touch with home base Spartan Mosquitoes is an intimate portrait of the adventures and hazards Scullion endured from coping with exhaust fumes to full blown fires giving readers a window into his historic contribution to proving sovereignty of Canada's Arctic
