Confrontation with the Unconscious Scott J. Hill, 2019-06-05 Carl Gustav Jung pioneered the transformative potential of the deep unconscious Psychedelic substances provide direct and powerful access to this inner world How then might Jungian psychology help us to better understand the nature of psychedelic experiences And how might psychedelics assist the movement toward psychological transformation described by Jung Jungian depth psychology and psychedelic psychotherapy are both concerned with coming to terms with unconscious drives complexes and symbolic images Unaware of significant evidence for the safe clinical use of psychedelic drugs Jung himself remained wary of psychedelics and staunchly opposed their therapeutic use His bias has prevented Jungians from objectively considering the benefits as well as the risks of using psychedelics for psychological healing and growth *Confrontation with the Unconscious* intertwines psychedelic research personal accounts of psychedelic experiences and C G Jung's work on trauma the shadow psychosis and psychospiritual transformation including Jung's own confrontation with the unconscious to show the relevance of Jung's penetrating insights to the work of Stanislav Grof Ann Shulgin Ronald Sandison Margot Cutner among other psychedelic and transpersonal researchers and to demonstrate the great value of Jung's penetrating insights for understanding difficult psychedelic experiences and promoting safe and effective psychedelic exploration and psychotherapy

Rhetorical Investigations Leslie Gardner, 2013-04-12 Rhetorical analysis of texts exposes plausible truths and presumptions implied by the writer's presentation In this volume Leslie Gardner analyses the master psychologist Jung who claimed to be expert at uncovering personal psychological truths In his theoretical writings his rhetoric reveals philosophical ramifications which bear strong similarities to those of the rhetorician of the 18th century Italian philosopher Giambattista Vico This book is driven by an interest in arguing that it is possible to read Jung's works easily enough when you have a set of precepts to go by The paradox of scientific discovery being set out in Jung's grotesque and arcane imagery begins to seem a startling and legitimate psychology for the 21st century It is time Jungian studies took on this most appropriate examination of analytical psychology Bringing Vico to bear directly on Jung's thought has only been cursorily attempted before although much alluded to We find indeed that some of Jung's ideas derive directly from rhetorical theory and this volume proposes to highlight Jung's innovations and bring him into forefront of contemporary psychological thought *Rhetorical Investigations* will be of interest

Laws of Inheritance Elizabeth Brodersen,2015-08-14 Instilled in interdisciplinary cross cultural perspectives of mythical socio economic literary pedagogic and psychoanalytic representations two archetypal creative inheritance laws interact as twins Eros fusion containment safety and Thanatos division separation risk Hypothesising these twin laws as matrilineal Eros and patrilineal Thanatos this book explores why cross cultural forms including gender traits are not fixed but are instead influenced by earlier flexible matrilineal forms Through a study of twins on macro and micro levels Elizabeth Brodersen argues that a psychological twin dilemma is implicit in inheritance laws and offers a unique forum to show how each law competes for primacy as the first and other Chapters begin by looking at twins in creation myths and the historical background to the laws of inheritance as well as literary representations The book then moves on to the developmental structures imbued in twin research and educational systems to explore how past cultural forms have been re defined to fit a modern landscape and the subsequent movement away from the importance of patrilineal primogeniture *Laws of Inheritance* will be of key value to academics researchers and postgraduate students in the fields of psychoanalysis psychotherapy archetypal theory cross cultural depth psychology cultural anthropology sociology gender studies and twin research The book will also be of interest to practicing psychoanalysts and psychotherapists

New Faces of God in Latin America Virginia Garrard,2020-11-01 Combining historical and ethnographic research methods along with a thorough review of existing literature on the study of Latin American Christianity *New Faces of God in Latin America* addresses the important question of how global religion and local culture interact situating the experience of Latin American Christianity in the broader conversations in the field of world Christianity particularly with respect to the growing understanding of Christianity as a non Western religion Through case studies of different Pentecostal experiences in Latin America Virginia Garrard explores cross pollination and interaction with indigenous religions and cultures finding widely varied responses to the material and spiritual needs of Latin Americans The author locates Latin American religious experience within a field known as the history of non Western Christianity This focuses on the experience perceptions and adaptations of those who adopt Christianity outside the context of Western missionary or other colonizing projects The book engages with the intersection of culture and spirit filled religion with an eye to how those interactions help frame an alternative religious modernity

Throughout the book the author uses culture as both a heuristic lens and as a variable within the equation. She argues that culture helps us understand how people engage with and reconfigure global religious flows within their own imaginations and for their own parochial uses.

Prisoner of Infinity Jasun Horsley, 2018-03-20. *Prisoner of Infinity* examines modern day accounts of UFOs, alien abductions and psychism to uncover a century long program of psychological fragmentation, collective indoctrination and covert cultural, social and mythic engineering. Whether it is the forces of God, government aliens from outer or inner space or the incalculable effects of childhood sexual trauma on the human psyche, premature contact with these forces compels us to create crucial fictions. Such semi-coherent mythic narratives make partial sense out of our experience but in the process turn us into the unreliable narrators of our own lives. Taking UFOs and the work of experimenter Whitley Strieber as its departure point, *Prisoner of Infinity* explores how beliefs are created and perceptions are managed in the face of the inexplicably complex forces of our existence. While keeping the question of a non-human and/or paranormal element open, the book maps how all too human agendas such as the CIA's MK Ultra program have co-opted the ancient psychological process of myth-making, giving rise to dissociative, dumbed-down Hollywood versions of reality. The New Age movement, UFOs, alien abductions, psychism, psychedelic mind expansion, Transhumanism, the Space Program, what if they are all productions devised by committee in dark rooms to serve social, political and economic goals that are largely devoid of true substance or meaning. Through an exacting and enlivening process of social, cultural and psychological examination and excavation, *Prisoner of Infinity* uncovers the most deeply buried treasure of all: The original, uncredited author of all mystery and meaning: the human soul.

Marian Apparitions in Cultural Contexts Valeria Céspedes Musso, 2018-10-03. *Marian Apparitions in Cultural Contexts* provides an analysis of collective phenomena, specifically mass visions of the Virgin Mary, from a psychoanalytical perspective. It draws from Jung's compensation theoretical model with the aim of merging depth psychology and historical material from the Zeitoun case. Offering an original interpretation of this phenomenon from a Jungian psychological perspective, the book provides stimulating insights to any person interested in these supernatural events, whether general readers with active curiosity or scholars with broad intellectual interests. A review of the literature points to a prevailing socio-political approach to examining visions of the Virgin Mary, while a psychoanalytical approach is generally lacking. Musso draws from Jung's compensation theoretical model in *Flying Saucers* with the aim of merging depth psychology and historical material. Common themes and symbols are extracted and interpreted from the empirical material and analyzed along with Egyptian social and political data. The book concludes with a discussion on how depth psychological principles grounded in empirical and historical material could be applied in order to explicate cases of mass visions. An original interdisciplinary exploration of cultural phenomena, *Marian Apparitions in Cultural Contexts* will be of value to academics and students in the fields of psychoanalysis, analytical psychology, political science and religious studies. This book will also be of interest among Jungian scholars and practitioners in applications of depth psychology to cultural phenomena.

Negativity in Psychoanalysis Duane Rousselle, Mark Gerard Murphy, 2023-12-22 Negativity in Psychoanalysis examines the role of negativity in psychoanalytic theory and its application in clinical settings While theories around negativity and death drive have become routinized within philosophical interpretations of Freudian and Lacanian psychoanalysis they often mask an inherent positivity This volume assembles highly esteemed psychoanalytic theorists and clinicians for an in depth discussion on the topic It features comprehensive introductions to Freudian and Lacanian perspectives alongside contemporary clinical and cultural issues The book also investigates how psychoanalytic negativity influences and is influenced by social theological and philosophical dialogues This work will prove invaluable for practicing psychoanalysts and those in training while also appealing to academics and scholars in critical and cultural theory continental and post continental philosophy and sociology especially those whose research intersects clinical and theoretical traditions **Secret Body** Jeffrey J. Kripal, 2017-11-14 This latest work by the renowned historian of religions Jeffrey Kripal crystallizes his twenty five years of work on two aspects of the contemporary study of religion the erotic expression of mystical experience and the rise of the paranormal in American culture Combining elements of memoir manifesto and anthology a Kripal Reader as it were Secret Body reveals Kripal s oeuvre not as a series of disconnected books but as a dynamic corpus with the potential to renew and reshape the study of religion Kripal explains how this oeuvre came about with his trademark humor and honesty answers his censors and critics and lays the foundation for a future theory of religion grounded in the cosmic nature of consciousness as such No one interested in the history of religion and the erotic dimension of mysticism can afford to overlook Kripal s latest his definitive intellectual self portrait A Jungian and Mythological View of Economics Jennifer Degnan Smith, 2025-07-31 This book aims to re vision economics by taking a Jungian view of the recent global economic crisis of the 2010s focusing on Greece s challenging experience in particular Recognizing the genius loci of Greece by taking a terrapsychological approach allows Greece to be an active participant in the discussions rather than purely an object to be studied Observing the crisis through the lenses of mythology cultural complexes and the God image deepens the understanding of modern day economics These viewpoints reveal the unconscious and archetypal elements at play in the dysfunctions Exposing the foundational issues is critical to redeeming economics and confirms the value in seeing socioeconomic issues from a Jungian perspective The issues revealed through the exploration are not unique to Greece but rather reflect many of the fundamental problems of the current global economic system Thus like its ancient myths Greece s modern day story of suffering has insights for today s world The audience for this book includes and extends beyond Jungian psychology and will also appeal to some in the field of economics and those interested in the application of Jungian ideas to sociocultural issues Cultural Complexes in Europe Jörg Rasche, Thomas Singer, 2025-03-26 What is going on in Europe The actual conflicts between its nations or states can be traced back to old and revived cultural complexes In this book first compiled in 2016 Jungian analysts explore the cultural identities of their European homelands and nations This is a new

approach to old questions What makes a people feel at home How do their traditions and narratives form a cultural Self and identity How do they differ from one another Exploring cultural complexes blends knowledge of history economics sociology anthropology geography psychology religious studies literature and poetry But as every complex is built around an emotional core the study of how cultural complexes live in the psyche is not limited to these disciplines Each author and reader engages in a confrontation with their emotions prejudices and projections The shape that the ideas and feelings of a cultural complex take in the psyche can be inchoate rapidly shifting and yet paradoxically long standing and often quite immune and impermeable to the reason that traditional disciplines of thought would impose on them These cultural complexes do not necessarily provide a coherent or linear sequencing of facts and events because that is not how they actually exist and function in the psyche of individuals and groups At the same time cultural complexes shape what it means to be a citizen of a particular city region or country of Europe This remarkable book is an important read for Jungian analysts and those interested in Europe's historical and cultural development

Perpetual Adolescence Sally Porterfield, Keith Polette, Tita French Baumlín, 2015-05-11 Arguing that American culture appeals to and is populated by children and adolescents who merely appear to be adult men and women the essays in *Perpetual Adolescence* examine the Jungian archetype of the eternal youth the puer aeternus as it is manifested in the arrested development of American culture From the infantilization of the American psyche and the lionization of teenaged celebrities and bodies to fanatical conformity and puerile entertainment the contributors probe the various ways that American television music film print Internet education and social movements work to nourish and sustain this child archetype Offering analytic psychology as an instrument of social analysis and critique they point to the need for dialogue over the causes and effects of our puer fixations which have become in large part both a creation and a creator of the American zeitgeist

Perversion Fiona Ross, 2018-04-17 Theoretical understanding of perversion is neglected in analytical psychology and narrowly developed in psychoanalysis where it traditionally refers to sexual perversion Etymological exploration of the word perversion including its use in religious moral sociological and legal contexts reveals a wider meaning than that adopted in psychoanalysis The aim of the author is to revise the psychoanalytic model through the introduction of Jungian concepts that extend the understanding of perversion beyond the bounds of sexuality to a more general relational context By describing the development of psychoanalytic thinking on perversion in detail the author is able to highlight the central differences between the Freudian and Jungian interpretive traditions and to explain why Jungian ideas on perversion have remained underdeveloped leading to the absence of a unique or available Jungian contribution to the theory of perversion
