The State of the Global Education Crisis UNESCO, United Nations Children's Fund, World Bank (the), 2021-12-09 The global disruption to education caused by the COVID 19 pandemic is without parallel and the effects on learning are severe The crisis brought education systems across the world to a halt with school closures affecting more than 1.6 billion learners While nearly every country in the world offered remote learning opportunities for students the quality and reach of such initiatives varied greatly and were at best partial substitutes for in person learning Now 21 months later schools remain closed for millions of children and youth and millions more are at risk of never returning to education Evidence of the detrimental impacts of school closures on children's learning offer a harrowing reality learning losses are substantial with the most marginalized children and youth often disproportionately affected Countries have an opportunity to accelerate learning recovery and make schools more efficient equitable and resilient by building on investments made and lessons learned during the crisis Now is the time to shift from crisis to recovery and beyond recovery to resilient and transformative education systems that truly deliver learning and well being for all children and youth The World Bank website

Deaf Education Beyond the Western World Harry Knoors, Maria Brons, Marc Marschark, 2019-01-16 If teachers want to educate deaf learners effectively they have to apply

evidence informed methods and didactics with the needs of individual deaf students in mind Education in general and education for deaf learners in particular is situated in broader societal contexts where what works within the Western world may be quite different from what works beyond the Western world By exploring practice based and research based evidence about deaf education in countries that largely have been left out of the international discussion thus far this volume encourages more researchers in more countries to continue investigating the learning environment of deaf learners based on the premise of leaving no one behind Featuring chapters centering on 19 countries from Africa Asia Latin America and Central and Eastern Europe the volume offers a picture of deaf education from the perspectives of local scholars and teachers who demonstrate best practices and challenges within their respective regional contexts This volume addresses the notion of learning through the exchange of knowledge outlines the commonalities and differences between practices and policies in educating deaf and hard of hearing learners and looks ahead to the prospects for the future development of deaf education research in the context of recently adopted international legal frameworks Stimulating academic exchange regionally and globally among scholars and teachers who are fascinated by and invested in deaf education this volume strengthens the foundation for further improvement of education for deaf children all around the world

How Deaf Children Learn Marc Marschark, Peter C. Hauser, 2012 In this book renowned authorities Marschark and Hauser explain how empirical research conducted over the last several years directly informs educational practices at home and in the classroom and offer strategies that parents and teachers can use to promote optimal learning in their deaf and hard of hearing children

Evaluating the Complex Kim Forss, Mita Marra, Robert Schwartz, 2017-07-12 In the economic atmosphere following the crisis of 2008 not only have governments reacted by creating more complex policy initiatives but they have also promised that all of these initiatives will be evaluated Due to the complexity of many of the initiatives the ways of evaluating are becoming equally complex The book begins with a theoretical and conceptual explanation of the process and shows how this translates into the practice of evaluation The chapters cover a wide variety of subjects such as poverty homelessness smoking prevention HIV AIDS and child labor The use of case studies sheds light on the conceptual ideas at work in organizations addressing some of the world's largest and most varied problems The evaluation process seeks a balance between order and chaos The interaction of four elements simplicity inventiveness flexibility and specificity allows complex patterns to emerge The case studies illustrate this framework and provide a number of examples of practical management of complexity in light of contingency theories of the evaluation process itself These theories in turn match the complexity of evaluated policies strategies and programs The evaluation process is examined for its impact on policy outcomes and choices

Education and Extremisms Farid Panjwani, Lynn Revell, Reza Gholami, Mike Diboll, 2017-08-09 Education and Extremisms addresses one of the most pressing questions facing societies today how is education to respond to the challenge of extremism It argues that the implementation of new teaching techniques curricular reforms or top down

changes to education policy alone cannot solve the problem of extremism in educational establishments across the world. Instead the authors of this thought provoking volume argue that there is a need for those concerned with radicalisation to reconsider the relationship between instrumentalist ideologies shaping education and the multiple forms of extremisms that exist. Beginning with a detailed discussion of the complicated and contested nature of different forms of extremism including extremism of both a religious and secular nature the authors show that common assumptions in contemporary discourses on education and extremism are problematic. Chapters in the book provide a careful selection of pertinent and topical case studies, policy analysis and insightful critique of extremist discourses. Taken together the chapters in the book make a powerful case for re-engaging with liberal education in order to foster values of individual and social enrichment, intellectual freedom, criticality, open mindedness, flexibility and reflection as antidotes to extremist ideologies. Recognising recent criticisms of liberalism and liberal education the authors argue for a new understanding of liberal education that is suitable for multicultural societies in a rapidly globalising world. This book is essential reading for academics, researchers and postgraduate students with an interest in religion, citizenship education, liberalism, secularism, counter terrorism, social policy, Muslim education, youth studies and extremism. It is also relevant to teacher educators, teachers and policymakers.

Understanding and Using Educational Theories Karl Aubrey, Alison Riley, 2015-11-28. I expect that this book will equip and inspire students to engage first hand with the texts of these creative and influential educational writers: David Aldridge, Programme Lead Professional Education, Oxford Brookes University. If you're training to teach or studying education, a clear understanding of major educational theories and the thinkers behind them is essential in order to appreciate how different practices impact on learning. This textbook gives you a clear overview of the most influential twentieth and twenty-first century thinkers on education, including established names including Vygotsky, Bruner, Dewey, more recent writers such as Freire, Kolb, Claxton and many other important theorists whose writings have helped shape our views on teaching and learning. Each chapter includes practical examples showing how theories can be used to inform classroom teaching, critiques of each theorist, exploring opposing viewpoints and the strengths and weaknesses of different ideas, reflective tasks inviting you to apply what you've read to your own educational experiences.
