## **Most Beautiful Man In Existence The Scandalous Life Of Alexander Lesassier:**

**The Most Beautiful Man in Existence** Lisa Rosner, 2013-04-06 1833 Catherine Jane Hamilton returned from India to Edinburgh to seek a divorce from her husband the physician Alexander Lesassier The charge was adultery and proof for it lay in a trunk containing her husband's personal papers Catherine won her suit without difficulty and the trunk was deposited in the library of the Royal College of Physicians of Edinburgh Alexander Lesassier died in 1839 during the First Afghan War his trunk and its contents remained untouched for the next century and a half It has now been opened and a remarkable tale told in remarkable detail has spilled forth The life of Alexander Lesassier as expertly reconstructed by Lisa Rosner affords startling insight into the sensibilities of an era and of the man who in his own eyes and those of the women who adored him was its most perfect creation Affable and self absorbed engaging and ignoble Lesassier was a physician military surgeon and novelist who was also a shameless opportunist charming scoundrel seducer and survivor His is the story of a failed medical man who wanted to be something different and saw himself as entitled to more than he had someone who can always be guaranteed to make the wrong choice and then protest that he has done well This fascinating and deeply absorbing book offers rare insights into Georgian Regency and early Victorian Britain through the fortunes and misfortunes hopes and whims of the most beautiful man in existence

**Advancing with the Army** Marcus Ackroyd, Laurence Brockliss, Michael Moss, Kate Retford, John Stevenson, 2007-01-04 Providing the first ever statistical study of a professional cohort in the era of the industrial revolution this prosopographical study of some 450 surgeons who joined the army medical service during the Revolutionary and Napoleonic wars charts the background education military and civilian career marriage sons occupations wealth at death and broader social and cultural interests of the members of the cohort It reveals the role that could be played by the nascent professions in this period in promoting rapid social mobility The group of medical practitioners selected for this analysis did not come from affluent or professional families but profited from their years in the army to build up a solid and sometimes spectacular fortune marry into the professions and place their sons in professional careers The study contributes to our understanding of Britishness in the period since the majority of the cohort came from small town and rural Scotland and Ireland but seldom found their wives in the native country and frequently settled in London and other English cities where they often became pillars of the community

**Bodies Politic** Roy Porter, 2021-03-08 In this historical tour de force Roy Porter takes a critical look at representations of the body in health disease and death in Britain from the mid seventeenth to the twentieth century Porter argues that great symbolic weight was attached to contrasting conceptions of the healthy and diseased body and that such ideas were mapped onto antithetical notions of the good and the bad the beautiful and the ugly With these images in mind he explores aspects of being ill alongside the practice of medicine paying special attention to self presentations by physicians surgeons and quacks and to changes in practitioners public identities over time Porter also examines the wider symbolic meanings of disease and doctoring and the body politic Porter's book is

packed with outrageous and amusing anecdotes portraying diseased bodies and medical practitioners alike     *Nelson's Surgeon* Laurence Brockliss, John Cardwell, Michael S. Moss, 2005-10-06 In the lead up to the bicentenary of Trafalgar a number of important new studies have been published about the life of Nelson and his defeat of the Combined Fleet in 1805 Despite the significant role played by the health and fitness of the British crews in securing the victory little has been written hitherto about the naval surgeon in the era of the long war against France This book is intended to fill the gap Sir William Beatty 1773 1842 was surgeon of the Victory at Trafalgar An Ulsterman from Londonderry he had joined the navy in 1791 Before being warranted to Nelson's flagship Beatty had served upon ten other warships and survived a yellow fever epidemic court martial and shipwreck to share in the capture of a Spanish treasure ship After Trafalgar he became Physician of the Channel Fleet based at Plymouth and eventually Physician to Greenwich Hospital where he served until his retirement in 1838 As the book makes clear in drawing upon an extensive prosopographical database Beatty's career until 1805 was representative of the experience of the approximately 2 000 naval surgeons who joined the navy in the course of the war The first part of the biography provides a detailed and scholarly introduction to the professional education training and work of the naval surgeon But after 1805 Beatty became a member of the service elite and his career becomes interesting for other reasons In the final decades of his life Beatty was far more than a senior naval physician As a Fellow of the Royal Society director of the Clerical and Medical Insurance Company and director of the London to Greenwich Railway he was a prominent figure in London's business and scientific community who used his growing wealth to build a large collection of books and manuscripts His later life is testimony to the much wider contribution that some naval and army medical officers made to the development of the new Britain of the nineteenth century In Beatty's case too the contribution was original By publishing in 1807 his carefully crafted *Authentic Narrative of the Death of Lord Nelson* he was instrumental in forging the myth of the hero's last hours which has become a part of the national consciousness and has helped to define for generations the concept of Britishness     *War and the Militarization of British Army Medicine, 1793-1830* Catherine Kelly, 2015-10-06 This study demonstrates the emergence and development of the identity of the military medical officer and places their work within the broader context of changes to British medicine during the first half of the nineteenth century     *A Short History of Europe, 1600-1815* Lisa Rosner, John Theibault, 2015-03-26 A concise survey that introduces readers to the people ideas and conflicts in European history from the Thirty Years War to the Napoleonic Era The authors draw on gender studies environmental history anthropology and cultural history to frame the essential argument of the work     *Princeton Alumni Weekly*, 1999
