Mothers-in-Law and Daughters-in-Law Deborah M. Merrill, 2007-09-30 We all know have perhaps told a few stories about mothers in law and daughters in law It seems the stories are nearly always about relationships filled with conflict and abrasive words or actions But why is this relationship so difficult And is it always as bad as popular belief would have us think Deborah Merrill a woman s advocate and Sociology professor at one of our nation s top universities has been studying the relationship for nearly a decade and in this book explains where the difficulty is rooted how friendly pairs

have made it past problems that surface between a man's mother and his wife and how they became friends. Dozens of interviews with pairs of women made in laws by marriage illustrate Merrill's points from harmful ideas and actions to helpful approaches. At its core, this book holds that marriage requires the creation of a new and separate family which requires changes in roles as well as a redefinition of relationships. Hence, family boundaries need to be made permeable to allow for integration of the daughter-in-law and to allow the son to create his own separate and autonomous family. Family members need to be aware of and prepare for this, says Merrill. That, of course, may be easier said than done. But dozens of women who have become friends with their in-laws, some so much so that they drop the in-law and just call each other mother and daughter, explain how they got past the old popular notions and social structure to create goodwill and grow stronger families.

Daughters, Wives and Widows After the Black Death Mavis E. Mate, 1998. It has long been thought that the post-Black Death period offered unparalleled opportunities for women. However, through a careful consideration of economic and legal changes affecting women of all social classes and conditions, the author shows that this was not the case, taking issue with orthodox opinion. She argues that marriage at a late age was not customary for women and that the ability of wives to supplement their income with intermittent paid labour at harvest time, for example, was not so great as has been supposed; rather, most married women spent more time on unpaid agricultural labour on their own land than their peers had done in the pre-plague economy. Professor Mate also demonstrates that there is little evidence to support the current belief that widowhood was the period in a woman's life when she enjoyed most power, freedom and independence; moreover, legal changes were a mixed blessing for women, leaving some widows with a larger portion and a more secure title to land but totally depriving others. Throughout the book, much attention is paid to class as well as gender, showing how many things were determined by it, from what a woman wore or ate to the age at which she married, her power within the household and even her vulnerability to rape. Professor MAVIS E. MATE teaches in the Department of History at the University of Oregon. **A**

A

pioneer of modern motherhood studies, Andrea O'Reilly explores motherhood's current representation and practice, considering developments that were unimaginable decades ago: the Internet, interracial surrogacy, raising transchildren, male mothering, intensive mothering, queer parenting, the applications of new biotechnologies and mothering in the post-9/11 era. Her work pulls together a range of disciplines and themes in motherhood studies. She confronts the effects of globalization, HIV/AIDS, welfare reform, politicians as mothers, third-wave feminism and the evolving motherhood movement, and she incorporates Chicana, African American, Canadian, Muslim, queer, low-income, trans and lesbian perspectives.
