The Criminal Personality Samuel Yochelson, Stanton Samenow, 2000-04-01 The third in a series explicating the criminal mind this volume summarizes observations interpretations and conclusions derived from a study of 121 criminal men who used drugs and or alcohol to excess Originally set in writing by Yochelson before his death in 1976 the materials were edited and updated by Samenow for publication Systematic probing and repeated interviews were used as the vehicle for gathering information on common mental themes among men apprehended and sentenced for criminal acts Yochelson and Samenow attribute crime to a series of early irresponsible choices that predate drug use among drug using criminals Personality and personal choice variables are conceptualized as critical in initialing and maintaining use In what is called an indiscriminate search for excitement drug using criminals are characterized as expanding their criminal repertoire while excusing their actions by rationalizations sometimes invented by sociologists psychologists and psychiatrists Although these ideas are of considerable interest the real

value of the text lies in its intriguing presentation of drug user thinking Specifically three chapters are well worth reading The description of mental activities associated with such constructs as the high the nod and the rush are probably on target for many drug users whether criminal or not The chapter explaining drugs as facilitators offers several notions worthy of systematic inquiry as does the one devoted to principles for encouragement of behavior change Of perhaps greatest benefit to most readers are caveats regarding management of drug users in what may be seen as a cognitive behavioral framework Yochelson and Samenow contend that drug using criminal men represent the architects of their criminal life styles and that it is they themselves who can correct irresponsible thoughts and behaviors through application of logic over emotion

Report on Mind-altering Substances Pursuant to Assembly Resolution 17, 1969 Wisconsin Legislature. Assembly. Committee on State Affairs, 1969 Resources in education, 1984-08 **The Psychedelic Policy Quagmire** J. Harold Ellens, Thomas B. Roberts Ph.D., 2015-08-18 Edited by two preeminent scholars this book provides coverage of the policy issues related to the increasingly diverse treatments, practices and applications of psychedelics. Hallucinogenic substances like LSD, mescaline, peyote, MDMA and ayahuasca have a reputation as harmful substances that are enjoyed only by recreational users committing criminal acts. But leading international researchers and scholars who contributed to this book hold that the use of psychedelic substances for health, religious, intellectual and artistic purposes is a Constitutional right and a human right. Based on that conclusion these scholars focus on policy issues that regulate the use of psychedelic drugs in medicine, religion, personal life and higher education, arguing that existing regulations should match current and anticipated future uses. This volume has two parts. The first surveys research on the use of psychedelic drugs in medicine, religion and truth seeking following these topics through history and contemporary practice. The second section treats government policies that regulate the psychological, physiological, biochemical and spiritual aspects of research and experience in these fields. The Psychedelic Policy Quagmire Health Law Freedom and Society challenges medical and legal policy experts, ethicists, scientists and scholars with the question: How can we formulate policies that reduce the dangers of psychedelics misuse and at the same time maximize the emerging diverse benefits?
