Otherspace Johanna Drucker, Brad Freeman, 1992 Conceived at the National Air and Space Museum in Washington D C in December 1990 and printed at Nexus Press in Atlanta in October 1992 Colophon **My Mother Was a Computer** N. Katherine Hayles, 2010-03-15 We live in a world according to N Katherine Hayles where new languages are constantly emerging proliferating and fading into obsolescence These are languages of our own making the programming languages written in code for the intelligent machines we call computers Hayles s latest exploration provides an exciting new way of understanding the relations between code and language and considers how their interactions have affected creative technological and artistic practices My Mother Was a Computer explores how the impact of code on everyday life has become comparable to that of speech and writing language and code have grown more entangled the lines that once separated humans from machines analog from digital and old technologies from new ones have become blurred My Mother Was a Computer gives us the tools necessary to make sense of these complex relationships Hayles argues that we live in an age of intermediation that challenges our ideas about language subjectivity literary objects and textuality This process of intermediation takes place where digital media interact with cultural practices associated with older media and here Hayles sharply portrays such interactions how code differs from speech how electronic text differs from print the effects of digital media on the idea of the self the effects of digitality on printed books our conceptions of computers as living beings the possibility that human consciousness itself might be computational and the subjective cosmology wherein humans see the universe through the lens of their own digital age We are the children of computers in more than one sense and no critic has done more than N Katherine Hayles to explain how these technologies define us and our culture Heady and provocative My Mother Was a Computer will be judged as her best work yet OtherSpace Wes Platt, 2002 OtherSpace The 2001 Yearbook is a chronicle of a year in the life of an evolving science fiction saga that unfurls on the Internet every day www.otherspace.org Participants further the story which has been ongoing since 1998 and their actions often yield headline news in the OtherSpace Observer OtherSpace The 2001 Yearbook helps demonstrate the excitement and immediacy of this interactive storytelling environment **The Dual Muse** Lorin Cuoco, 1999 For centuries an artist adept in one medium has found solace encouragement and inspiration in another even to the point of merging them Michelangelo put down his chisel to pick up his pen Blake pictorialized his poetry Max Ernst collaged narratives Gertrude Stein adopted a cubist style This bicameral interplay of the verbal and pictorial has never been more pronounced than in our own time The Dual Muse explores a range of creative interrelationships between the visual arts and literary media in works by selected modern and contemporary artists and authors C++ for Programmers Paul J.
