Prometheus Bound The Mythic Structure Of Karl Marx's Scientific Thinking:

Prometheus Bound Leonard P. Wessell, 1984-01-01 **Prometheus Bound** Leonard P. Wessell, 1984-01-01 *Marx's Scientific Dialectics* Paul Paolucci, 2007 This book examines both problems in traditional readings of Marx's texts and how he used several methods of science to inform his dialectical thinking historical materialist research political economic analyses and his communist project A case is made for Marx's continuing methodological relevance Shelley's Process Jerrold E. Hogle, 1989-01-12 In this set of thorough and revisionary readings of Percy Bysshe Shelley's best known writings in verse and prose Hogle argues that the logic and style in all these works are governed by a movement in every thought memory image or word pattern whereby each is seen and sees itself in terms of a radically different form For any specified entity or figure to be known for what it is it must be reconfigured by and in terms of another one at another level which must then be dislocated itself In so delineating Shelley's process Hogle reveals the revisionary procedure in the poet's various texts and demonstrates the powerful effects of radical transference in Shelley's visions of human possibility **Karl Marx's Social and Political Thought** Bob Jessop, Russell Wheatley, 1999 From Darkness To Light Igal Halfin, 2000-07-15 In conjunction with Studies of the Harriman Institute In this interdisciplinary and controversial work Igal Halfin looks at Marxist theory in a new light attempting to break down the divisions between history philosophy and literary theory His approach is methodological combining intellectual and social history to argue that if we are to take the Bolshevik revolutionary experiment seriously we have to examine carefully the ideological presupposition of both communist ideological texts and the archival documents that social historians believe truly reflect lived experience in order to see what effects these texts had on reality Igal Halfin aims to turn Marxism class and consciousness from subjects of analysis to its objects *From Darkness to Light* begins by examining the Marxist philosophy of history as understood by the Russian revolutionary movement Halfin argues that the Soviet government took its cues to how it could bring about a classless society from a peculiar blending of eschatological thinking and modern techniques of power Halfin then offers a case study of the Bolshevik attempt in the 1920s to create the Communist New Man by amalgamating the characteristics of the intellectual and the worker in order to eradicate the petit bourgeois traits attributed by the regime to the pre-revolutionary individualistic and decadent student Halfin's conclusions raise important questions about Marxist theory as it relates to class historical progress and communism itself His approach suggests that proletarianization should be understood not as a change in the social composition of the student body but as the introduction of the language of class into the universities Through the examination of the process of the literary construction of class identity Halfin concludes that the student class affiliation in the Soviet Union of the 1920s was not simply a matter of social origins but of students ability using a set of ritualized procedures to defend their claims to a working class identity Halfin's conclusions raise important questions about Marxist theory as it relates to class historical progress and communism itself *Marxism and Phenomenology* Bryan Smyth, Richard Westerman, 2021-10-25 Marxism and

Phenomenology The Dialectical Horizons of Critique edited by Bryan Smyth and Richard Westerman offers new perspectives on the possibility of a philosophical outlook that combines Marxism and phenomenology in the critique of capitalism Although Marxism s focus on impersonal social structures and phenomenology s concern with lived experience can make these traditions appear conceptually incompatible the potential critical force of a theoretical reconciliation inspired several attempts in the twentieth century to articulate a phenomenological Marxism Updating and extending this approach the contributors to this volume identify and develop new and previously overlooked connections between the traditions offering new perspectives on Marx Husserl and Heidegger exploring themes such as alienation reification and ecology and examining the intersection of Marxism and phenomenology in figures such as Michel Henry Walter Benjamin and Frantz Fanon These glimpses of a productive reconciliation of the respective strengths of phenomenology and Marxism offer promising possibilities for illuminating and resolving the increasingly intense social crises of capitalism in the twenty first century

Alienation and Affect Warren TenHouten, 2016-12-01 Alienation has objective social structural determinants yet is experienced subjectively as a psychological state involving both emotion and cognition Part I considers conceptualizations of alienation and affect in historical context emphasizing Rousseau Hegel Marx Simmel and Weber Part II develops a theory of the affective bases of Seeman s original five varieties of alienation normlessness meaninglessness self estrangement cultural estrangement and powerlessness The book argues that both normlessness and cultural estrangement manifest in two distinct forms and involve distinct emotions Thus it develops the affective bases of seven distinct varieties of alienation This work synthesizes classical and contemporary alienation theory and the sociology of emotions It contributes to political sociology and finds application in social psychiatry and related health and social service fields that treat traumatized and highly alienated individuals *The Proletarian Dream* Sabine Hake, 2017-09-11 The proletariat never existed but it had a profound effect on modern German culture and society As the most radicalized part of the industrial working class the proletariat embodied the critique of capitalism and the promise of socialism But as a collective imaginary the proletariat also inspired the fantasies desires and attachments necessary for transforming the working class into a historical subject and an emotional community This book reconstructs this complicated and contradictory process through the countless treatises essays memoirs novels poems songs plays paintings photographs and films produced in the name of the proletariat The Proletarian Dream reads these forgotten archives as part of an elusive collective imaginary that modeled what it meant and even more important how it felt to claim the name proletarian with pride hope and conviction By emphasizing the formative role of the aesthetic the eighteen case studies offer a new perspective on working class culture as a oppositional culture Such a new perspective is bound to shed new light on the politics of emotion during the main years of working class mobilizations and as part of more recent populist movements and cultures of resentment Aldo and Jeanne Scaglione Prize for Studies in Germanic Languages and Literatures 2018 Minos and the Moderns Theodore Ziolkowski, 2008-07-17 Minos and the Moderns

considers three mythological complexes that enjoyed a unique surge of interest in early twentieth century European art and literature Europa and the bull the minotaur and the labyrinth and Daedalus and Icarus All three are situated on the island of Crete and are linked by the figure of King Minos Drawing examples from fiction poetry drama painting sculpture opera and ballet Minos and the Moderns is the first book of its kind to treat the role of the Cretan myths in the modern imagination Beginning with the resurgence of Crete in the modern consciousness in 1900 following the excavations of Sir Arthur Evans Theodore Ziolkowski shows how the tale of Europa in poetry drama and art but also in cartoons advertising and currency was initially seized upon as a story of sexual awakening then as a vehicle for social and political satire and finally as a symbol of European unity In contrast the minotaur provided artists ranging from Picasso to Drenmatt with an image of the artist's sense of alienation while the labyrinth suggested to many writers the threatening sociopolitical world of the twentieth century Ziolkowski also considers the roles of such modern figures as Marx Nietzsche and Freud of travelers to Greece and Crete from Isadora Duncan to Henry Miller and of the theorists and writers including T S Eliot and Thomas Mann who hailed the use of myth in modern literature Minos and the Moderns concludes with a summary of the manners in which the economic aesthetic psychological and anthropological revisions enabled precisely these myths to be taken up as a mirror of modern consciousness The book will appeal to all readers interested in the classical tradition and its continuing relevance and especially to scholars of Classics and modern literatures
