## **Pursuit Of Truth:**

Pursuit of Truth Willard Van Orman Quine, 1990 In Pursuit of Truth W V Quine gives us his latest word on issues to which he has devoted many years As he says in the preface In these pages I have undertaken to update sum up and clarify my variously intersecting views on cognitive meaning objective reference and the grounds of knowledge The pursuit of truth is a quest that links observation theory and the world Various faulty efforts to forge such links have led to much intellectual confusion Quine s efforts to get beyond the confusion begin by rejecting the very idea of binding together word and thing rejecting the focus on the isolated word For him observation sentences and theoretical sentences are the alpha and omega of the scientific enterprise Notions like idea and meaning are vague but a sentence now there s something you can sink your teeth into Starting thus with sentences Quine sketches an epistemological setting for the pursuit of truth He proceeds to show how reification and reference contribute to the elaborate structure that can indeed relate science to its sensory evidence In this book Quine both summarizes and moves ahead Rich lively chapters dissect his major concerns evidence reference meaning intension and truth Some points he writes have become clearer in my mind in the eight years since Theories and Things Some that were already clear in my mind have become clearer on paper And there are some that have meanwhile undergone substantive change for the better This is a key book for understanding the effort that a major philosopher has made a large part of his life s work to naturalize epistemology in the twentieth century The book is concise and elegantly written as one would expect and does not assume the reader s previous acquaintance with Quine s writings Throughout it is marked by Quine s wit and economy of style **The Pursuit of Truth** Sarvepalli Radhakrishnan, 1979

**The Concept of Truth in International Relations Theory** Matthew Fluck, 2017-04-12 This book charts the role played by conceptions of truth in the development of a critical tradition of International Relations theory Providing a detailed account of the conceptions which have shaped the work of Critical Theorists and Poststructuralists the book reaffirms the importance of epistemic reflection for the discipline It argues that the partially abstract character of the main strands of critical IR arises not from their concern with epistemic matters but from their insistence that truth is purely intersubjective Drawing on the philosophy of Theodor Adorno the book argues that IR's critical tradition can be rejuvenated by combining its original politicisation of truth with a critical account of its objectivity The book will be a valuable resource for scholars and graduate students interested in the future of critical International Relations theory

*Truth and Consequences* Reed Way Dasenbrock, 2010-11-01 Contemporary literary theory takes truth and meaning to be dependent on shared conventions in a community of discourse and views authors' intentions as irrelevant to interpretation This view argues Reed Way Dasenbrock owes much to Anglo American analytic philosophy as developed in the 1950s and 1960s by such thinkers as Austin and Kuhn but it ignores more recent work by philosophers like Davidson and Putnam who have mounted a counterattack on this earlier conventionalism This book draws on current analytic philosophy to resuscitate the notion of objective truth and intentionalist models of meaning and interpretation thereby moving beyond the antifoundationalism of postmodern theory It addresses the work of Rorty and Fish as representative of literary conventionalism discusses the futility of Derrida's anti-intentionalism and shows how poststructuralist thinkers like Althusser and Foucault have contributed to the new thematics of race class gender and sexual orientation that dominates literary theory today Examining the counterarguments of conventionalists to have their theory judged by its consequences Dasenbrock shows how damaging this antiobjectivism and anti-intentionalism have been for literary studies

*Artistic Truth* Lambert Zuidervaart, 2004-10-18 It is unfashionable to talk about artistic truth Yet the issues traditionally addressed under that term have not disappeared Indeed questions concerning the role of the artist in society the relationship between art and knowledge and the validity of cultural interpretation have intensified Lambert Zuidervaart challenges intellectual fashions He proposes a new critical hermeneutics of artistic truth that engages with both analytic and continental philosophies and illuminates the contemporary cultural scene People turn to the arts as a way of finding orientation in their lives communities and institutions But philosophers hamstrung

by their own theories of truth have been unsuccessful in accounting for this common feature in our lives This book portrays artistic truth as a process of imaginative disclosure in which expectations of authenticity significance and integrity prevail Understood in this way truth becomes central to the aesthetic and social value of the arts **DEFENDANT STANDING**

**Value** Markus Mühling,David Andrew Gilland,Yvonne Förster,2019-11-11 The theme of this volume is the question of value perception It is discussed from different philosophical psychiatric theological and anthropological perspectives The thesis that unites all the papers is the recognition that we live in a relational dynamic world in which we primarily perceive and that to dissolve values from facts is fundamentally misleading both in theory as in life The contributions are the outcome of an energetic conference in 2016 where the problems at stake were rigorously discussed The results are presented here and they have an explicit order and are strictly related It opens with basic questions and observations then critical opinions and objections come into play after which the outline of a larger theory of value perception is presented and at the end some

concrete examples from material practices are drawn Post-Subjectivity Andrew German, Merav Mack, Christoph Schmidt, 2014-04-11 Modern thinkers have often declared the end or even the death of the subject and have been searching for new ways of being a self Indeed many contemporary scholars regard this search as one of the most significant effects of the general crisis of secularity Post Subjectivity is a contribution to that search conducted with a renewed attention to the centrality of religion in a pluralistic and global context This volume of essays guides the reader through but also beyond the crises of modernity and postmodernity toward an attempt to resurrect the subject in new forms The volume resonates with voices from across the humanistic disciplines the theological turn in recent phenomenology new directions in Christian and Jewish theology and reappraisals of figures in the history of philosophy psychoanalysis and the study of sexuality all are represented in an attempt to rethink from the beginning what it is to be a self **Sanathana Dharma: The Eternal Quest**
