**Investing in Democracy** Carmen Sirianni, 2010-10-01 The health of American democracy ultimately depends on our willingness and ability to work together as citizens and stakeholders in our republic Government policies often fail to promote such collaboration But if designed properly they can do much to strengthen civic engagement That is the central message of Carmen Sirianni's eloquent new book Rather than encourage citizens to engage in civic activity government often puts obstacles in their way Many agencies treat citizens as passive clients rather than as community members overlooking their ability to mobilize assets and networks to solve problems Many citizen initiatives run up against rigid rules and bureaucratic silos causing all but the most dedicated activists to lose heart The unfortunate and unnecessary result is a palpable decline in the quality of civic life Fortunately growing numbers of policymakers across the country are figuring out how government can serve as a partner and catalyst for collaborative problem solving Investing in Democracy details three such success stories neighborhood planning in Seattle youth civic engagement programs in Hampton Virginia and efforts to develop civic environmentalism at the U S Environmental Protection Agency The book explains what measures were taken and why they succeeded It distills eight core design principles that characterize effective collaborative governance and concludes with concrete recommendations for federal policy

*Saving Souls, Serving Society* Heidi Rolland Unruh, Ronald J. Sider, 2005-10-06 Recent years have seen unprecedented attention to faith based institutions as agents of social change spurred in part by cuts in public funding for social services and accompanied by controversy about the separation of church and state The debate over faith based initiatives has highlighted a small but growing segment of churches committed to both saving souls and serving society What distinguishes faith based from secular activism How do religious organizations express their religious identity in the context of social services How do faith based service providers interpret the connection between spiritual methodologies and socioeconomic outcomes How does faith motivate and give meaning to social ministry Drawing on case studies of fifteen Philadelphia area Protestant churches with active outreach Saving Souls Serving Society seeks to answer these and other pressing questions surrounding the religious dynamics of social ministry While church based programs often look similar to secular ones in terms of goods or services rendered they may show significant differences in terms of motivations desired outcomes and interpretations of meaning Church based programs also differ from one another in terms of how they relate evangelism to their social outreach agenda Heidi Rolland Unruh and Ronald J Sider explore how churches navigate the tension between their spiritual mission and the constraints on evangelism in the context of social services The authors examine the potential contribution of religious dynamics to social outcomes as well as the relationship between mission orientations and social capital Unruh and Sider introduce a new vocabulary for describing the religious components and spiritual meanings embedded in social action and provide a typology of faith based organizations and programs Their analysis yields a framework for Protestant mission

orientations that makes room for the diverse ways that churches interrelate spiritual witness and social compassion Based on their observations the authors offer a constructive approach to church state partnerships and provide a far more objective understanding of faith based social services than previously available      **Faith-based Perspectives on the Provision of Community Services** United States. Congress. House. Committee on Government Reform. Subcommittee on Criminal Justice, Drug Policy, and Human Resources,2004      **The Oxford Handbook of Civil Society** Michael Edwards,2011-08-29

Broadly speaking The Oxford Handbook of Civil Society views the topic of civil society through three prisms as a part of society voluntary associations as a kind of society marked out by certain social norms and as a space for citizen action and engagement the public square or sphere It does not focus solely on the West a failing of much of the literature to date but looks at civil society in both the developed and developing worlds Throughout it merges theory practice and empirical research In sum the Handbook will be the definitive work on the topic      Governing by Network Stephen Goldsmith,William D. Eggers,2005-06-22 A fundamental but mostly hidden transformation is happening in the way public services are being delivered and in the way local and national governments fulfill their policy goals Government executives are redefining their core responsibilities away from managing workers and providing services directly to orchestrating networks of public private and nonprofit organizations to deliver the services that government once did itself Authors Stephen Goldsmith and William D Eggers call this new model governing by network and maintain that the new approach is a dramatically different type of endeavor that simply managing divisions of employees Like any changes of such magnitude it poses major challenges for those in charge Faced by a web of relationships and partnerships that increasingly make up modern governance public managers must grapple with skill set issues managing a contract to capture value technology issues incompatible information systems communications issues one partner in the network for example might possess more information than another and cultural issues how interplay among varied public private and nonprofit sector cultures can create unproductive dissonance Governing by Network examines for the first time how managers on both sides of the aisle public and private are coping with the changes Drawing from dozens of case studies as well as established best practices the authors tell us what works and what doesn't Here is a clear roadmap for actually governing the networked state for elected officials business executives and the broader public      *A Public Charity* Mary L. Mapes,2004-10-19 Using Indianapolis as its focus this book explores the relationship between religion and social welfare Arising out of the Indianapolis Polis Center's Lilly sponsored study of religion and urban culture the book looks at three issues the role of religious social services within Indianapolis's larger social welfare support system both public and private the evolution of the relationship between public and private welfare sectors and how ideas about citizenship mediated the delivery of social services Noting that religious nonprofits do not figure prominently in most studies of welfare Mapes explores the historical roots of the relationship between religiously affiliated social welfare and public agencies Her approach recognizes that local variation has been a defining feature of American

social welfare A Public Charity aims to illuminate local trends and to relate the situation in Indianapolis to national trends and events Polis Center Series on Religion and Urban Culture David J Bodenhamer and Arthur E Farnsley II editors **The Enduring Tension** Donald J.
