Putting Knowledge Networks Into Action:

Putting Knowledge Networks into Action Andrea Back, Georg von Krogh, Andreas Seufert, Ellen Enkel, 2005-06-24 The concepts and theories of knowledge management and networks are well documented Yet there are few if any guidelines on how to implement knowledge management within an organization especially focusing on how to manage knowledge in a network environment This book visualizes paths that allow one to make connections between theories concepts and concrete actions It shows how to integrate these different roots into a holistic view on managing knowledge in networks It develops a methodology which will support the reader to move concrete steps forward towards building and maintaining knowledge networks in his organization

Putting Knowledge Networks into Action Andrea Back, Georg von Krogh, Andreas Seufert, 2005-04-07 The concepts and theories of knowledge management and networks are meanwhile well documented Yet there are few if any guidelines on how to implement knowledge management within an organization especially focusing on how to manage knowledge in a network environment This shows that managing knowledge in networks is a rather new and unexplored field This book visualizes paths that allow one to make connections between theories concepts and concrete actions Knowledge networks are organizational forms within companies that connect key experts to share knowledge and therefore fulfil strategic goals Managing knowledge in network environments is a fast moving field attempting to integrate various disciplines such as human resources organizational development change management strategy information technology sociology and network theory This book shows how to integrate these different roots into a holistic view on managing knowledge in networks It develops a methodology which will support the reader to move concrete steps forward towards building and maintaining knowledge networks in his organization

Social Knowledge Management in Action Remko Helms, Jocelyn Cranefield, Jurriaan van Reijssen, 2017-02-23 Knowledge management KM is about managing the lifecycle of knowledge consisting of creating storing sharing and applying knowledge Two main approaches towards KM are codification and personalization The first focuses on capturing knowledge using technology and the latter on the process of socializing for sharing and creating knowledge Social media are becoming very popular as individuals and also organizations learn how to use it The primary applications of social media in a business context are marketing and recruitment But there is also a huge potential for knowledge management in these organizations For example wikis can be used to collect organizational knowledge and social networking tools which leads to exchanging new ideas and innovation The interesting part of social media is that by using them one immediately starts to generate content that can be useful for the organization Hence they naturally combine the codification and personalisation approaches to KM This book aims to provide an overview of new and innovative applications of social media and to report challenges that need to be solved One example is the watering down of knowledge as a result of the use of organizational social media Von Krogh 2012
