Power Tools Jeanne Dyches,Ashley S. Boyd,Katherine Baker,Alex Kaulfuss,2023-10-11 Virtually all national standards now require students and teachers to understand the particulars of disciplinary literacy But recently emerging scholarship suggests that disciplinary literacy is by itself an incomplete and potentially problematic approach to secondary literacy instruction By asking students to think like or even be like experts

students may receive implicit messaging about whose knowledge is and isn't valued. Critical disciplinary literacy (CDL) creates space for and highlights connections between critical literacies and disciplinary literacies. CDL acknowledges disciplines as unique communities with their own specialized and often exclusionary skills, norms, practices, and discourses but deviates from conventional applications of disciplinary literacy by responding to the ways in which power systems and the analytic skills needed to understand them work differently based on the disciplines at hand. A CDL instructional approach acknowledges that applying the critical literacy skills of reading the word and the world to understand the power dynamics of vaccine distributions requires a different skill set and strategy approach than looking at textual representations of masculinity in *Romeo and Juliet*. Written by a team of educators with over 70 combined years of classroom experience, *Power Tools: 30 Critical Disciplinary Literacy Strategies for 6-12 Classrooms* offers readers research-based, multidisciplinary, ready-to-implement disciplinary literacy strategies from critical literacy lenses. The book sets itself apart from other strategy textbooks by offering creative strategy implementation that calls attention to power systems. Educators can learn, for example, how they might employ read-alouds to explore the global refugee crisis or use the exit ticket strategy to help students reflect on the relationship between race and COVID statistics. *Power Tools: 30 Critical Disciplinary Literacy Strategies for 6-12 Classrooms* provides standards-aligned lessons that both challenge and extend traditional engagement practices to build a more just world. Each chapter includes an overview of each strategy situated within the research of best practices. Two disciplinary examples for each CDL strategy, e.g., an example of a CDL think-aloud in seventh-grade math and tenth-grade ELA classroom. Chapters provide resources such as examples of student work, discussion prompts, dialogue between teacher and students, and reprintables. Ideas for addressing resistance to CDL instruction. Preservice and in-service teachers, as well as teacher educators and researchers looking to do and support justice-oriented work in disciplinary spaces, will find value in the book. *Power Tools* is an ideal text to implement in courses such as Disciplinary Literacy, Secondary Literacy, Content Area Literacy, Methods, Strategies for Teaching Social Justice, Multicultural Education, ELA methods, Science methods, Social Studies methods, and Mathematics methods.

Word Power Spelling Book 2, *Teaching What They Learn, Learning What They Live* Brad Olsen, 2015-11-17. Cogent, interesting, and provocative from the foreword by Ann Lieberman. *Teaching What They Learn, Learning What They Live* explores the multiple social, political, and epistemological domains that comprise learning to teach. Based on a study of eight beginning English teachers at four different university teacher preparation programs, this book examines the ways in which beginning teachers' personal dispositions and conceptions combine with their teacher preparation programs, professional knowledge, and contexts to form their understandings of and approaches toward teaching. Brad Olsen recasts learning to teach as a continuous, situated identity process in which prior experiences produce deeply embedded ways of viewing the world that go on to organize current/future experience into meaning. Since experience shapes learning and everyone acquires different sets of experience, no individual teacher's knowledge is exactly

like another s Yet Olsen shows also that the process by which a teacher constructs professional knowledge is common the what of teacher knowledge varies but the how remains the same
