Les Pygmées d'Afrique centrale Guy Philippart de Foy, 1984 **Dans la Forêt D'Afrique Centrale** Serge Bahuchet, 1992 Peeters 1992 **Pygmées d'Afrique centrale** Stefan Seitz, 1993 Peeters 1994 **Governing Africa's Forests in a Globalized World** Laura A. German, Anne-Marie Tiani, Alain Karsenty, 2009-12 Many countries around the world are engaged in decentralization processes and most African countries face serious problems with forest governance from benefits sharing to illegality and sustainable forest management This book summarizes experiences to date on the extent and nature of decentralization and its outcomes most of which suggest an underperformance of governance reforms and explores the viability of different governance instruments in the context of weak governance and expanding commercial pressures over forests Findings are grouped into two thematic areas decentralization livelihoods and sustainable forest management and international trade finance and forest sector governance reforms The authors examine diverse forces shaping the forest sector including the theory and practice of decentralization usurpation of authority corruption and illegality inequitable patterns of benefits capture and expansion of international trade in timber and carbon credits and discuss related outcomes on livelihoods forest condition and equity The book builds on earlier volumes exploring different dimensions of decentralization and perspectives from other world regions and distills dimensions of forest governance that are both unique to Africa and representative of broader global patterns Authors ground their analysis in relevant theory while attempting to distill implications of their findings for policy and practice **Global Ecology in Historical Perspective** Kazunobu Ikeya, William Balée, 2023-03-10 This book primarily examines human animal and human plant interactions in Asian forests Southeast Asia and Japan and inland waters China For comparison cases from the Americas whales in the Arctic sea turtles in the Caribbean and plants in the Amazon and Central Asia are also included The relationship between plants animals and humans in Asia is quite unique from a global perspective For example satoyama in Japan means ecotone area or the boundary between a village and a forest There as the number of inhabitants declines bears wild boars and other animals increasingly ravage crops sometimes attacking humans as well By showing the regional nature of human animal and human plant interactions in Asia this book provides for the first time a framework for understanding the world s animal and plant human relationships It is assumed that the relationships between humans and animals and plants during this period were diverse including hunting taming semi domestication and full domestication At the same time for regions outside of Asia the extent to which these diverse relationships were adapted and how diversity was formed is explained from the perspective of historical ecology Customers can expect to derive perspectives on the coexistence of human animal and plant animal relationships from this book in the near future The conservation of rare species diverse habitats and biodiversity is a central theme in considering the relationship between modern civilization and the global environment In post industrial Japan one focus has been the protection of iconic animals such as storks crested ibis dugongs

and sea turtles while damage to crops and humans by deer wild boars monkeys bears and other common animals has become an important social issue How can the world s 7 7 billion plus people live in harmony with other species We would like to get some hints on how to solve the problems we are facing Chez les pygmées d'Afrique centrale, des outils de l'éphémère...

Forests of Belonging Stephanie Karin Rupp,2011-12-01 *Forests of Belonging* examines the history and ongoing transformation of ethnic and social relationships among four distinct communities Bangando Baka Bakw le and Mbomam in the Lob k forest region of southeastern Cameroon By slotting forest communities into ecological categories such as hunters and gatherers previous analyses of social relationships in tropical forests have resulted in binary frameworks that render real life relationships invisible and that have perpetuated correspondingly misleading labels such as pygmy Through rich descriptive detail resulting from field work among the Bangando Stephanie Rupp illustrates the complexity of social ties among groups and individuals and their connections with the natural world She demonstrates that social and ethno ecological relations in equatorial African forests are nuanced contested and shifting and that the intricacy of these links must
