Hapgood,1966 Hapgood utilizes ancient maps as concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient

Egypt Hapgood concluded that these ancient mapmakers were in some ways much more advanced in mapmaking than any people prior to the 18th century Hapgood believes that they mapped all the continents This would mean that the Americas were mapped thousands of years before Columbus Antarctica would have been mapped when its coasts were free of ice Hapgood supposes that there is evidence that these people must have lived when the Ice Age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene Ice Age land bridge The Mystery of Easter Island Katherine Routledge,1998 Heavily illustrated with a wealth of old photos this book is a treasury of information on the most mysterious of islands Easter Island Rapa Nui *Parapolitics* Kenn Thomas,2006 From the Kennedy assassination to 9 11 Thomas examines the underlying parapolitics that animate the secret elites and the war ravaged planet they manipulate This volume is a compilation of his lecture remarks interviews correspondence and articles printed in the underground press from around the world **The Greenhouse Conspiracy** John Dowdee,2003 America had smashed bin Laden and destroyed his global networks But now deep inside the American homeland a new cult of high tech terrorists is emerging with a weapon more deadly than any ever imagined by al Qaeda Candice a pugnacious researcher from FEMA discovers that the climatic gyrations over the last decade are not natural phenomena The weird weather has been secretly engineered by an environmental group that now threatens to unleash devastating storms unless Congress enacts a series of draconian environmental protection laws Luke a graduate student who has been cashiered from the marines teams up with Candice to discover the truth at any cost They are aided by Michelle a vivacious computer science professor who is an expert hacker Together they plunge into a maze of deception that stretches from the most powerful men in Washington to the secrets of ancient Egypt In less than three weeks all members of Congress and the President will be dead unless Luke and his team can unravel the mystery In a shocking turnabout Luke discovers that the terrorist have a different agenda Luke must draw upon his innermost strengths to save the world from the Greenhouse Conspiracy **The Power of Language in the Making of International Law** Stephane Beaulac,2004-04-01 The purpose of this book is to enter into the history of the mental social phenomena that are the word sovereignty and the myth of Westphalia Given the circularity of language the project proposes to examine the reality creating role of language as an organic instrument of social power within humanity In semiotic terms the complex structures of words and also myths form part of sign systems in which they can both represent and create reality These are the passive and active functions of language which explain that words and myths not only represent and describe reality but may also play a leading part in creating and transforming reality thus demonstrating and being used to carry fabulous power within humanity The Peace of Westphalia is analysed to show that in spite of what actually took place in 1648 Westphalia has had an incredible social effect in international law standing for the proposition that it signalled the beginning of a new era based on state sovereignty However it is argued that Westphalia constitutes a myth an aetiological myth which has provided a way for society to explain itself to itself that is a way for international society

to explain its genesis to itself As regards sovereignty it is shown that Jean Bodin introduced the word in Six Livres for the purpose of having the French ruler enjoy supreme power in the hierarchical organisation structure of society This is the original creative and transforming social effect on the shared consciousness of humanity for which the linguistic sign must be credited which has continued unaltered to this day With respect to Droit des Gens it is demonstrated that Emer de Vattel utilised and actually changed the reality associated with sovereignty also for a specific reason namely to carry out its externalisation the ruling entity was now to enjoy exclusive power to govern which entailed being the sole representative of the people both internally and externally and also meant that it could not be submitted to any foreign state or to any higher law externally Vattel s use of the word has had an extraordinary effect on the shared consciousness of society including that of the emerging international society which is still very much present today These two archetype cases in which sovereignty developed show how this word has really had two paradigms over the years that is it has represented and created the two distinct realities of the internal and the international
