The Armour of Hitler's Allies in Action, 1943-1945 Ian Baxter,2023-02-22 While much has been written about the Nazis panzers comparatively little is known about the armored vehicles in service with the other Axis armies This classic Images of War book redresses the balance by covering in detail the equipment operated by these nations supporting Hitler s war machine Using rare and often unpublished photographs with full captions and authoritative text it provides a comprehensive coverage of Romanian Bulgarian and Hungarian tanks and other armored fighting vehicles In addition it describes Yugoslavian Serbian and Slovakian armor in addition to armor originating from the Fatherland Examples of tanks and assault guns are the Romanian TCAM R 2 Panzer 35t tank destroyer TACAM T 38 Panzer 38t the Bulgarian Jadgpanzer 38 t StuG40 Ausf G Pz Kp IV AusH and the Hungarian StuG III Ausf G not forgetting Tigers Panthers As well as giving technical specifications the book traces the fighting record of these vehicles between 1943 1945 It shows how armored units fought bands of partisans and were used to defend their frontiers against the overwhelming might of the Red Army until they were either captured or destroyed *Panzer Crewman* Simon Forty,Richard Charlton-Taylor,2025-02-28 great detailed shots and drawings for those looking for references in their models Highly recommended for beginners to advanced builders AMPS The German Panzerwaffe ripped up the rulebooks of war that had been laid down by the grinding slaughter of the trenches of World War I Armored vehicles close air support and bold leadership based on mission command Auftragstaktik cut a deadly swathe through the armies of east and west Europe The Panzers made a significant contribution to Nazi successes they remained steadfast in defense as their conquests slipped away their grasp from the apogee at Stalingrad and El Alamein in late 1942 through the long years of retreat to final defeat Attrition and overwhelming odds blunted the opportunities for advances but with increasingly powerful weaponry the Panzerwaffe stiffened the German defensive backbone right to the end Part of the reason for these successes was undoubtedly the Panzers themselves but it wasn t just the weapons that led to the Panzers successes it was the way they were handled A weapon is only as good as those who use it and the Panzertruppen from higher command down to individual crew members proved themselves to be very good at using their weapons Not just the men who fought in the tanks but those who maintained them and kept them in the field recovered and rebuilt the casualties and dealt with the over complexity of design and the huge variety of types of tank weapon and ammunition Selection and training standards so good in the early war years may have dropped off as wartime exigencies bit deep but from 1939 to 1945 German Panzer crew were second to none This Casemate Illustrated provides a full introduction to the role and experience of the Panzer crewman **Tank Gun Systems** William Andrews,2023-06-30 Much has been written about the use of tanks in battle Little however has appeared about the gunnery systems that are at their core This book describes and examines the main gun systems of medium and heavy tanks from first use in 1916 in World War I to those fielded in numbers to the end of World War II in 1945 including tanks of the interwar period Specifically considered are guns

of a caliber greater than 35 mm which have been deployed in numbers greater than 100 The emphasis is on guns mounted in turrets on heavier tracked armored fighting vehicles greater than 15 tonnes which were considered tanks There are though exceptions in that the naval 6 pounder guns in First World War British tanks as well as the 75 mm guns in French medium tanks of the same period all turretless are included The treatment of gun systems includes sighting and fire control equipment gun laying equipment mounts and the array of munitions fired as well as the actual gun including its barrel cradle breech firing mechanism sights and recoil system Related to this are issues of gun handling loading and unloading ammunition design and rates of fire Also examined are the maximum impulse and energy generated by firing some of the munitions available that must be absorbed by the gun recoil system **Pz.Kpfw.38(T) Variations** Charles K. Kliment, Don Greer, 2013

German Infantryman vs British Infantryman David Greentree, 2015-10-20 When Hitler's forces poured into France and the Low Countries in 1940 the uneasy peace of the Phoney War was shattered and Europe was ripped apart by another Blitzkrieg Forming the backbone of the German advance were the well equipped Sch tzen Rifles motorized infantry who

embodied the essence of the fluid swift warfare that had characterized World War II thus far Facing them were infantrymen of the British Expeditionary Force units of considerable fighting quality who had nevertheless received no special training to conduct combined arms warfare in conjunction with armour This study investigates the combat between the two adversaries at small unit level recreating the ferocity of the fighting on the front lines of the Battle of France in three key clashes at Arras Calais and Merville Assessing the training organization and unit ethos of both sides in the context of a new type of mobile warfare David Greentree reveals the extraordinary difficulties encountered by infantry units in trying to remain in contact with their armoured and mechanized formations *Panzer III* Bob Carruthers,2013 **Library of Congress Subject**

PzKpfw IV However despite their limitations they ended up playing key roles in the victorious campaigns waged by the German Army from 1939 to 1942 This highly illustrated title describes the development and organizational history of the PzKpfw I introduced in 1934 and the PzKpfw II introduced in 1936 It explains how the annexation of German speaking Sudetenland in 1938 and subsequently of Czechoslovakia itself delivered an unexpected bonus for the Panzerwaffe in the form of two Czech Army light tanks introduced into German service as the PzKpfw 35 t and PzKpfw 38 t It goes on to cover the considerable operational service of these tanks in Poland France and the invasion of the Soviet Union in 1941 From late 1941 onwards they were withdrawn from front line service but the chassis were used until the end of the war for self propelled artillery and tank destroyers German armour expert Thomas Anderson draws on archival material after action reports and rare photographs in this comprehensive study of the German light Panzers that played a key role in the early years of World War II
