the development of animal exploitation **Royal Mounds of A'ali in Bahrain** Steffen Terp Laursen, 2017-12-21 The Royal Mounds of A'ali in Bahrain has long been shrouded in mystery and suspected to be the final resting place of the Bronze Age kings of Dilmun Puzzled by their great size explorers and professional archaeologists have for hundreds of years attempted to penetrate their interior and wrestle secrets and treasures from the tombs This book presents information from the early days of archaeological exploration at A'ali as well as new data from the joint Bahrain Moesgaard Museum investigations 2010-2016 directed by the author The evidence from both old and new field explorations at A'ali are meticulously analyzed The results are discussed with a strong focus on the royal cemetery as an institution using a theoretical approach based on the anthropology and ethnography of death rituals Emphasis is also placed on developing an architectural typology and a radio carbon based chronology of the royal tombs at A'ali In this study vast quantities of hitherto unpublished data from excavations in the burial mounds of Bahrain is integrated to allow a more informed and diachronic picture of the evolution in tomb architecture death rituals and social organization in the Early Dilmun period c 2200-1700 BC Philological evidence is presented which demonstrates that the entombed kings were of Amorite ancestry The study reveals that the Amorite Dynasty buried at A'ali emerged with the formation of huge monumental tombs in a royal cemetery proper around 2000-1900 BC and lost its grip on power c 1700 BC Life and Land Use on the Bahrain Islands Curtis E. Archaeology of Prehistoric Arabia Peter Magee, 2014-05-19 Encompassing a landmass greater than the rest of the Near East and Eastern Mediterranean combined the Arabian peninsula remains one of the last great unexplored regions of the ancient world This book provides the first extensive coverage of the archaeology of this region from c 9000 to 800 BC Peter Magee argues that a unique social system which relied on social cohesion and actively resisted the hierarchical structures of adjacent states emerged during the Neolithic and continued to contour society for millennia later The book also focuses on how the historical context in which Near Eastern archaeology was codified has led to a skewed understanding of the multiplicity of lifeways pursued by ancient peoples living throughout the Middle East
