Elie,2020-06-22 This two volume book offers a panoramic explanatory narrative of Soqatra Island s rediscovery based on the global significance of its endemic biodiversity The first volume A Post Exotic Anthropology of Soqatra A Mesography of an Indigenous Polity in Yemen initiated the analytical inventory of the four key vectors of Soqatra s transition process through a discussion of the first two economic disarticulation and political incorporation This volume A Post Exotic Anthropology of Soqatra Cultural Environmental Annexation of an Indigenous Community completes the analytical inventory by exploring the other two pivotal vectors of transition cultural modernization and environmental annexation These two vectors encompass the critical sociocultural spheres and environmental domains in which Soqatra s transformation process is

unfolding The origin of these vectors is situated within Soqotra s long history of exogenous mediations by external actors and their symbolic appropriation of the island into an imaginative geography The legacy is a symbolic curse which has made Soqotra into an ideal playground for fantasist cultural or environmental experiments Accordingly this volume undertakes first a systematic inventory of the communal effects engendered within the domains of cultural modernization dissonant linguistic attitudes alienating consumption practices divergent religious affiliations and differentiating economic aspirations Second it anatomizes the process of environmental annexation through the reconstruction of the formulation and implementation process of a biodiversity conservation and sustainable development experiment in which the island and its residents are appropriated into an anachronistic paradigm a pastoral ecotopia as a blueprint of their future

Political Ecology and the Role of Water Gerhard Lichtenthäler,2017-03-02 How can we explain the over exploitation and degradation of natural resources in the countries of the South Population growth poverty and problems associated with common property resource management have been common themes in this debate yet insufficient attention has been paid to how traditional political relations and local perceptions affect natural resource capture and resource allocation This is especially evident with respect to groups and communities at the political and geographical peripheries of state influence and control for whom self identity is constructed around notions of autonomy and food self sufficiency This informative book addresses this omission by discussing water resource allocation and management It focuses in particular on

the socio economic and political contexts which influence approaches to and determine practices of water management Taking the example of the tribal communities of the Sa dah basin in the northern Yemen it analyzes the politics of environmental change with particular reference to groundwater resource degradation within the conceptual framework of political ecology
