Inventing China through History Q. Edward Wang, 2001-01-01 A critical examination of the rise of national history in early twentieth century China **Familiar Strangers** Jonathan N. Lipman, 2011-07-01 Open access edition DOI 10.6069/9780295800554 The Chinese speaking Muslims have for centuries been an inseparable but anomalous part of Chinese society Sinophone yet incomprehensible local yet outsiders normal but different Long regarded by the Chinese government as prone to violence they have challenged fundamental Chinese conceptions of self and other and denied the totally transforming power of Chinese civilization by tenaciously maintaining connections with Central and West Asia as well as some cultural differences from their non Muslim neighbors Familiar Strangers narrates a history of the Muslims of northwest China at the intersection of the frontiers of the Mongolian Manchu Tibetan Turkic and Chinese cultural regions Based on primary and secondary sources in a variety of languages Familiar Strangers examines the nature of ethnicity and periphery the role of religion and ethnicity in personal and collective decisions in violent times and the complexity of belonging to two cultures at once Concerning itself with a frontier very distant from the core areas of Chinese culture and very strange to most Chinese it explores the influence of language religion and place on Sino Muslim identity **Encountering Chinese Networks** Sherman Cochran, Sherman Gilbert Cochran, 2000 The text studies how various Western Japanese and Chinese businesses struggled with the persistent dilemma in China of how to retain control over corporate hierarchies while adapting to dramatic changes in Chinese society politics and foreign affairs from 1880 1937 *A Chinaman's Chance* Eric Liu, 2014-07-08 From Tony Hsieh to Amy Chua to Jeremy Lin Chinese Americans are now arriving at the highest levels of American business civic life and culture But what makes this story of immigrant ascent unique is that Chinese Americans are emerging at just the same moment when China has emerged and indeed may displace America at the center of the global scene What does it mean to be Chinese American in this moment And how does exploring that question alter our notions of just what an American is and will be In many ways Chinese Americans today are exemplars of the American Dream during a crowded century and a half this community has gone from indentured servitude second class status and outright exclusion to economic and social integration and achievement But this narrative obscures too much the Chinese Americans still left behind the erosion of the American Dream in general the emergence perhaps of a Chinese Dream and how other Americans will look at their countrymen of Chinese descent if China and America ever become adversaries As Chinese Americans reconcile competing beliefs about what constitutes success virtue power and purpose they hold a mirror up to their country

in a time of deep flux In searching often personal essays that range from the meaning of Confucius to the role of Chinese Americans in shaping how we read the Constitution to why he hates the hyphen in Chinese American Eric Liu pieces together a sense of the Chinese American identity in these auspicious years for both countries He considers his own public career in American media and government his daughter s efforts to hold and release aspects of her Chinese inheritance and the still recent history that made anyone Chinese in America seem foreign and disloyal until proven otherwise Provocative often playful but always thoughtful Liu breaks down his vast subject into bite sized chunks along the way providing insights into universal matters identity nationalism family and more *Yoritomo and the Founding of the First Bakufu* Jeffrey P.

Mass,2000-01-01 This book is a much expanded and wholly rewritten treatment of the subject of the author s first book *Warrior Government in Early Medieval Japan* published in 1974 In this new version the warrior and medieval character of Japan s first shogunate is significantly de emphasized thus requiring not only a new title but also a new book The author s new view of the final decades of twelfth century Japan is one of a less revolutionary set of experiences and a smaller achievement overall than previously thought The pivotal figure Minamoto Yoritomo retains his dominant role in establishing the dual polity of Court and Bakufu but his successes are now explained in terms of more limited objectives A new regime was fit into an environment that was still basically healthy and vibrant leading not to the substitution of one government for another but rather to the emergence of a new authority that would have to interact with the old The book aims to present a dual perspective on the period by juxtaposing what we know against our best possible estimate of what Yoritomo himself knew It is deeply concerned with the multiple balancing acts introduced by this ever nimble experimenter in governing who was forever seeking to determine and then to promote what would work while curtailing or eliminating what would not The author seeks to recreate step by step the movement from one historical juncture to another whether this means adapting already available information building anew or working with combinations of materials Throughout the book addresses new topics and offers many new interpretations on subjects as wide ranging as the 1189 military campaign in the north and the phenomenon of delegated authority [Ethics in Early China](#) Chris Fraser,Dan Robins,Timothy O'Leary,2011-08-01

Early Chinese ethics has attracted increasing scholarly and social attention in recent years as the virtue ethics movement in Western philosophy has sparked renewed interest in Confucianism and Daoism At the same time intellectuals and social commentators throughout greater China have looked to the Chinese ethical tradition for resources to evaluate the role of traditional cultural values in the contemporary world Publications on early Chinese ethics have tended to focus inordinate and uncritical attention toward Confucianism while relatively neglecting Daoism Mohism and shared features of Chinese moral psychology This book aims to rectify this imbalance by including essays on Daoism and Confucianism early Chinese moral psychology including widely neglected views of the Mohists and newly reconstructed accounts of the embodied virtue tradition which ties ethics to physical cultivation The volume also includes essays addressing the broader question of the

value of comparative philosophy generally and of studying early Chinese ethics in particular The book should have a wide readership among professional scholars and graduate students in Chinese philosophy specifically Confucian ethics Daoist ethics and comparative ethics Chris Fraser is associate professor of philosophy at the University of Hong Kong Dan Robins is assistant professor of Chinese philosophy at Stockton College of New Jersey Timothy O Leary is associate professor of philosophy at the University of Hong Kong Contributors include Roger Ames Stephen Angle Sin yee Chan Jiwei Ci Chris Fraser Jane Geaney William Haines Chad Hansen Manyul Im P J Ivanhoe Franklin Perkins Lisa Raphals Dan Robins Henry Rosemont Jr David Wong and Lee Yearley

Going to the Countryside Yu Zhang, 2020-03-03 Since the beginning of the twentieth century modern Chinese intellectuals reformers revolutionaries leftist journalists and idealistic youth had often crossed the increasing gap between the city and the countryside which made the act of going to the countryside a distinctively modern experience and a continuous practice in China Such a spatial crossing eventually culminated in the socialist state program of down to the villages movements during the 1960s and 1970s What then was the special significance of going to the countryside before that era Going to the Countryside deals with the cultural representations and practices of this practice between 1915 and 1965 focusing on individual homecoming rural reconstruction revolutionary journeys to Yan an the revolutionary going down to the people as well as going to the frontiers and rural hometowns for socialist construction As part of the larger discourses of enlightenment revolution and socialist industrialization going to the countryside entailed new ways of looking at the world and ordinary people brought about new experiences of space and time initiated new means of human communication and interaction generated new forms of cultural production revealed a fundamental epistemic shift in modern China and ultimately created a new aesthetic social and political landscape As a critical response to the urban turn in the past few decades this book brings the rural back to the central concern of Chinese cultural studies and aims to bridge the city and the countryside as two types of important geographical entities which have often remained as disparate scholarly subjects of inquiry in the current state of China

studies Chinese modernity has been characterized by a dual process that created problems from the vast gap between the city and the countryside but simultaneously initiated constant efforts to cope with the gap personally collectively and institutionally The process of crossing two distinct geographical spaces was often presented as continuous explorations of various ways of establishing the connectivity interaction and relationship of these two imagined geographical entities Going to the Countryside argues that this new body of cultural productions did not merely turn the rural into a constantly changing representational space most importantly the rural has been constructed as a distinct modern experiential and aesthetic realm characterized by revolutionary changes in human conceptions and sentiments

Conceptualising China through translation James St. André,2023-11-07 This monograph provides an innovative methodology for investigating how China has been conceptualised historically by tracing the development of four key cultural terms filial piety face fengshui and guanxi between English and Chinese It addresses how specific ideas about what constitutes the uniqueness of Chinese culture influence the ways users of these concepts think about China and themselves Adopting a combination of archival research and mining of electronic databases it documents how the translation process has been bound up in the production of new meaning In uncovering how both sides of the translation process stand to be transformed by it the study demonstrates the dialogic nature of translation and its potential contribution to cross cultural understanding It also aims to develop a foundation on which other area studies might build broader scholarship about global knowledge production and exchange

East Asian Cultural and Historical Perspectives

University of Alberta. Research Institute for Comparative Literature and Cross-Cultural Studies,1997 **Living Chinese Philosophy** Roger T. Ames,2024-10-01 In Living Chinese Philosophy Roger T Ames uses comparative cultural hermeneutics as a method for contrasting classical Greek ontology the science of being in itself with classical Chinese zoetology the art of

living which is made explicit in the Yijing or Book of Changes Parmenides Plato and Aristotle give us a substance ontology grounded in being qua being or being per se to on he on that guarantees a permanent and unchanging subject as the substratum for the human experience This substratum or essence includes its purpose for being telos and defines the what it means to be a thing of this kind eidos of any particular thing thus setting a closed exclusive boundary and the strict identity necessary for a particular thing to be this and not that In the Book of Changes we find a vocabulary that makes explicit cosmological assumptions that are a stark alternative to this substance ontology It also provides the interpretive context for the canonical texts by locating them within a holistic organic and ecological worldview To provide a meaningful contrast with this fundamental assumption of on or being we might borrow the Greek notion of zoe or life and create the neologism zoeology as the art of living shengshenglun This cosmology begins from living sheng itself as the motive force behind change and gives us a world of boundless becomings not things that are but events that are happening a contrast between an ontological conception of human beings and a process conception of what the author calls human becomings
