*Reflexive Research and the (Re)Turn to the Baroque* Cate Watson, 2008-01-01

Reflexive research and the re turn to the baroque Or How I learned to stop worrying and love the university seeks an answer to the question posed by Gilles Deleuze Why do we desire what oppresses us The book presents a narrative conceived within a baroque framework which attempts with a proper sense of irony to reveal the truth about the academy and the way in which as institution it constructs our desires The book also sets out a methodology for exploring questions related to identity and discourses and discusses how a sense of baroque characterised as belonging to the epistemology of the Wunderkammer the baroque cabinet of curiosities and the ontology of the fold as elaborated by Deleuze challenges current assumptions about the nature of research and our understanding of the world Reflexive research and the re turn to the baroque is a contribution to the growing body of research located within the baroque conceptualised not as a discrete historical period but as a recurring cultural phenomenon which presents as counter to the prevailing orthodoxy To the baroque mind the world is not conceived in logical Cartesian terms To the contrary it is full of contradictions The baroque mind moreover is acutely aware of the conflict between illusion and reality and paradox and complexity are accepted as almost natural phenomena Leo Forkey It is essential reading writes the author for qualitative researchers and students concerned to develop innovative approaches in their work as well as for those with an interest in identities and processes of identification
