**World Suffering and Quality of Life** Ronald E. Anderson, 2015-02-04 This is the first book tackling the topic of world suffering. It compiles in one place the ideas, perspectives and findings of researchers from around the world who pioneered research based understanding of human suffering. Some chapters use the paradigm of quality of life to explore ways to enhance knowledge on suffering. Other chapters show how concepts and knowledge from suffering research can benefit studies on quality of life. By bringing together in one volume ideas and research experience from the best minds and leading researchers in the fields of pain, suffering, poverty, deprivation, disability and quality of life, including well being and happiness, this volume advances social science solutions to a number of major threads of research, most notably suffering. As a whole, the volume advances the fields of suffering and deprivation by suggesting a working typology of suffering and by pointing out the major paradigms for relief of suffering, such as humanitarianism, human rights, caring and healing. This volume provides a wealth of insights about the interaction between suffering and quality of life, the most up to date characterization of worldwide suffering and a grasp of the implications of these data for local and global policy on health and social well being.

*Global Overshoot* Doug Cocks, 2013-03-13 *Global Overshoot* is a multidisciplinary analysis including history and pre history from an ecological and evolutionary perspective of the contemporary world system. This book compares and critiques attitudes held by people with different world views to the hypothetical prospect of large widespread falls in quality of life. It also draws insights from these two analyses to develop and suggest a philosophy of Ecohumanism to people of good will who want to think constructively about the world's converging problems. I think altruistically and think like an evolving ecosystem.

**How Educational Ideologies Are Shaping Global Society** Joel Spring, 2014-04-08 In this book Joel Spring explores three major international educational ideologies that are shaping global society: neo liberal educational ideology, human rights education and environmentalism. Neo liberal ideology reflects a rethinking of nationalist forms of education as the nation state slowly erodes under the power of a growing global civil society. Traditional nationalist education attempts to mold loyal and patriotic citizens who are emotionally attached to symbols of the state, whereas the goal of neo liberal educational ideology is to change nationalist education to serve the needs of the global economy. These changes are fueling a clash between the ideas of free market and consumer based neo liberals and those of human rights and environmental educators. Human rights education is concerned with creating activist global citizens. It is rooted in the idea that inherent in human rights doctrines is a collective responsibility to ensure the rights of all people. Environmentalism is the most radical of the ideologies because it rejects the industrial and consumerist paradigm that has dominated most economic thought, including capitalism and communism. Spring synthesizes and analyzes the effect of these educational ideologies on shaping the future of the global society. In the concluding section, he compares the effect of these ideologies on global society with the possibility of a world divided between conflicting civilizations.

contemporary constellations of international politics and global transformation It offers guidance on how to conceptualize the complexity of current global changes and practical policy advice in order to promote an open global society In the light of today's challenges the author reinterprets the main argument of the philosopher Karl Popper in *The Open Society and Its Enemies* Based on this framework and new empirical evidence the book discusses the thesis of an ongoing Third World War triggered by fundamental deficits in nation building occurring primarily within states and not between them and accelerated by asymmetric forms of warfare and Islamist totalitarianism The book also explores various threats to the global order such as the paradox of borders as barriers and bridges the global effects of the youth bubble in many developing countries and the misuse of religious interpretation for the use of political violence Lastly the author identifies advocates and supporters of a liberal multilateral and open order and argues for a reinvention of the Western world to contribute to a revival of a liberal global order based on mutual respect and joint leadership

**Deep Change and Emergent Structures in Global Society** Andrea M. Maccarini, 2019-03-01 This book addresses the problem of the transition to new forms of social order in the global world As a haunting sense of historical discontinuity pervades Western societies it offers a fresh perspective on the issue focusing on two basic coordinates to pinpoint the developmental path of rapidly changing societies one is the mechanism of unfettered social morphogenesis and the other is the specific kind of societal unification brought about by globalization with the related closure of the world The book draws on the theoretical work produced in the five volumes of the Springer series Social Morphogenesis and applies it in a sustained and concerted approach to the empirical examination of macro social change The first part of the book presents the social ontology of the morphogenetic approach and discusses its capacity to interpret macrosocial transitions The second part then draws a prospective outline of the social formation known as the morphogenic society showing how unbound morphogenesis in a globalized world shapes such crucial phenomena as social norms war and violence openness and closure as adaptive responses from social organizations Lastly the third part examines the anthropological consequences of these societal trends focusing on self and character as well as on human fulfillment and the good life
