Report of the Retinal and Choroidal Diseases Panel, 1983 **Fifth International Visual Field Symposium** E.L. Greve, A. Heijl, 2012-12-06 The 5th International Visual Field Symposium of the International Perimetric Society was held on October 20 23 1982 in Sacramento California before the joint meeting of the International Congress of Ophthalmology and the American Academy of Ophthalmology A majority of the members of the International Perimetric Society took part in the meeting together with many guests The topics of the symposium were glaucoma correlation between the visual field and the optic disc the visual field in low tension glaucoma neuro ophthalmology and ergo perimetry Apart from this there were many papers on automated perimetry and general topics The papers concerning the correlation of optic disc and visual field dealt with several aspects peripapillary atrophy defects in the retinal nerve fiber layer fluorescein angiography and the characteristics of the glaucomatous excavation itself New and interesting findings were presented showing that the careful detailed observation of the disc and peripapillary area is rewarding The visual fields in low tension glaucoma were studied extensively by four groups Various approaches to the problem have led to some differences in results which were extensively discussed In the general glaucoma session the visual fatigue phenomenon was discussed extensively apparently conflicting results were demonstrated regarding the stability of contrast threshold measurements during one and the same test session in glaucoma The relationship between the visual field and the performance at the working place was considered in the session on ergo perimetry **Third International Visual Field Symposium Tokyo, May 3-6, 1978** E.L. Greve, 2012-12-06 ERIK L GREVE The 3rd International Visual Field Symposium was held on the 4th till the 6th of May 1978 in Tokyo for the members and guests of the International Perimetric Society The Proceedings of this symposium follow the general lines of the programme with some minor alterations This symposium was a so called topic symposium where selected topics were introduced by experts in the field These topics were Neuro ophthalmology 1 Funduscorrelates of visual field defects 2 Visual field defects due to tumors of the sellar region Glaucoma 1 The earliest visual field defects in glaucoma 2 The reversibility of glaucomatous visual field defects Methodology 1 Automation 2 The relation between the position of a lesion in the fundus and in the visual field Apart from the introductory papers free papers were given on the topics non topic free papers and also some Much attention has been given to the discussion Most of the discussion remarks in this Proceedings are the original taped remarks of the discussion speakers We have chosen this form of presentation to take to the reader the atmosphere of the discussion and to preserve originality The chairman of the

sessions have presented a summary or even better an interpretation of the trends in their topics This introduction gives a short overview of the main themes of the symposium Cumulated Index Medicus ,1970 **Seventh International Visual Field Symposium, Amsterdam, September 1986** E.L. Greve,A. Heijl,2012-12-06 The Seventh International Visual Field Symposium organized by the International Perimetric Society was held in Amsterdam The Netherlands September 6 10 1986 In many respects it was an exciting and fruitful meeting The number of participants was greater than ever The number of papers was too great to accommodate all of them The quality of the papers reflects the continuously rising interest in perimetry in general and in automated perimetry in particular Last but not least the social programme was organized in the by now almost classical friendly enjoyable and humorous style of the International Perimetric Society This created an atmosphere of openness and free exchange of information which was clearly also felt in the scientific sessions The scientific part was divided in seven sessions with 44 spoken papers and a separate poster session during which the 46 posters were discussed The major themes of the meeting were The influence of media disturbances on the visual field and Advances in perimetry in glaucoma with special emphasis on progression The session on media provided interesting information on how the visual field was effected by preretinal filters The authors either studied the influence of lens or corneal opacities or simulated opacities by special filters placed in front of the eye In two papers the effect of cataract was qualified by photography or stray light measurements Ryan's Retinal Imaging and Diagnostics E -Book Stephen J.
