Marketing analytics applies quantitative techniques that enable companies to identify hidden customer shopping patterns and produce actionable insights.

- The value of marketing analytics, however, is dependent on the data that companies possess.

### CRM AND MIS and AI

**CRM** is a company-wide business strategy designed to optimize profitability, revenue, and customer satisfaction by focusing on highly defined and precise customer groups.

**MIS** is a marketing information system designed to support marketing decision making.

- (1) Store data about customers, supply chain partners and internal, external company data

**AI** is the development of computer systems that can perform tasks that normally require a person such as visual perception, decision making and speech recognition.

### Data type

**Structure** Structured data consist of numeric fields. For example, ZIP Codes, sales figures, and numerical or categorical survey results are all structured data.

**Unstructured** data that are not organized in a predefined manner from social media posts, online communications, customer service call records, or emails with the company. This type of data consists of images, videos, audio files, and text—such as reviews or social media posts.

### Data Source and Collection

Data sources involve **primary data** and **secondary data**.

**Primary data** are collected for the first time to solve a specific problem or answer specific Questions. Result from surveys, interviews, and experiments are example of primary data. The research is conducted to achieve a specific purpose.

- (1) Primary data has a significant advantage in that this type of data can answer specific questions.
- (2) But it can also be costly and require a lot of time to collect.

**Secondary data** are data that have been previously collected for another reason. It might not be capable of answering a specific question but is usually available immediately and might provide an initial starting point to assist in further development of a research study. It is also much less expensive to gather than primary data.

There are many sources of secondary data, such as the following:
